AU BALES OFFERED		35,334	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD		31,495	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																		
AU PASSED-IN%		10.9%

MARKET COMMENTARY Source: AWEX

This week saw the wool market record an increase for the first time in over a month. However, the increase was mainly a result of solid gains in the carding and crossbred sectors. The merino fleece market performed with mixed results, with all three centres recording varied outcomes for similar wools. A large selection of fine tender wools struggled to attract strong buyer demand, this contributed to the Micron Price Guides (MPGs) of 19 and finer generally falling by 30-50 cents. 19.5 to 20.5 micron attracted excellent competition and managed modest increases for the week, while a limited selection of 21 micron and broader were generally unchanged when compared to the previous sale.

The NRI recorded a 10 cent increase for the week, to close at 1819 cents. As a result of the finer microns suffering larger losses over the previous few months, the price differentials between microns has shrunk considerably. This is best highlighted when looking at the difference between the MPGs of a 19 and a 21 micron. Currently, this difference is averaging only 47 cents, compared to over 110 cents when the MPGs peaked back in August.

The skirtings market had an up and down week, losses were felt on the first selling day, then gains on the second, resulting in prices being generally unchanged. As mentioned earlier, the crossbred sector recorded gains for the week. Prices generally increased by 5-5 cents, with the largest gains felt on the better prepared lines.

After two months of continual large losses, the oddment sector has finally recorded price increases. Locks, stains and crutchings generally rose by 50 to 120 cents. These rises helped to push the three carding indicators up by an average of 89 cents.

The national quantity remains very similar next week. Currently, there are 35,334 bales on offer.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1923 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1421 for 60% of the time, over the past ten years.

JEMALONG WOOL BULLETIN

(week ending 15/11/2018)

Page 10/27

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

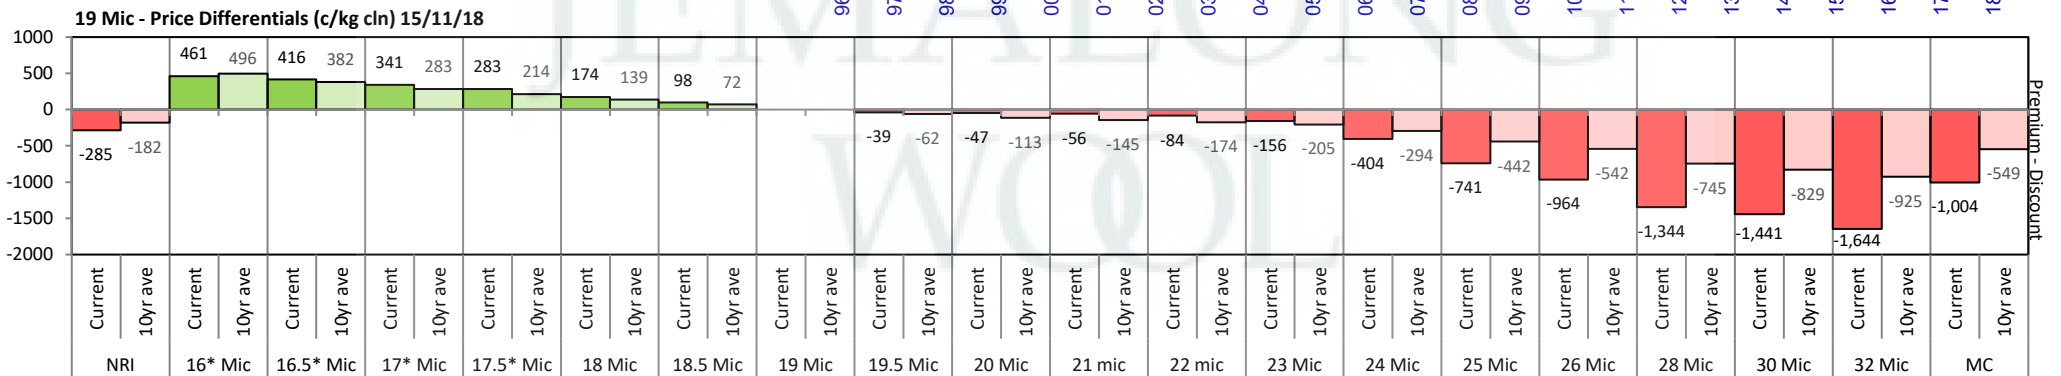

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
