AU BALES OFFERED		47,914	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD		44,820	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																		
AU PASSED-IN%		6.5%

MARKET COMMENTARY Source: AWI & AWEX

The market finished the year on a positive note (on the back of strong support for Merino types). The EMI closed the year 49 cents higher YOY (a 54-cent increase for the week). The rally over the past fortnight has pushed the EMI 103 cents higher (+8.4%), making it the best-performing December on record (since 1979).

Competition on all lots was fierce from the outset, given it was the final chance for exporters to buy at auction until early next year. The spirited bidding was maintained throughout the first day, pushing prices continually higher. As with the previous sale many of the highest prices for specific types were recorded late in the day at the Fremantle selling centre. Increases of 50 were common for many MPG's. The rally continued into Wednesday, where there were further gains of 30 cents. Melbourne sold in isolation on Thursday, which was the final selling day of the year. The market was more subdued, initially opening in line with the previous day before easing back slightly late in the day. Most pressure was on the lower spec types. In contrast, the more stylish types maintained good support through to the close. Merino Skirtings also found good support during the week and rose over all three selling days. Crossbreds sold at similar levels to the previous sale, with the finer microns (25/26) recording rises of 20 to 30 cents. Merino Cardings firmed slightly.

The offering was just under 48,000 bales (for the series), making it the fourth largest for the 2022/23 season. The market now heads into the annual three-week Christmas recess. Sales will resume in Week 28, which is the week beginning Monday, the 9th of January.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1659 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1673 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
