AU BALES OFFERED		44,434	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		42,537	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI & AWEX

A vigorous start to the New Year saw price gains recorded across all types and descriptions at the opening wool auctions. Competition was intense from the outset and continued throughout most of the selling week. Currency conversion was the major factor at play, with an almost 2% Forex advantage compared to the closing sales in December.

Prior to sale, exporters were reporting some new (non-game-changing) demand from overseas users having received steady inquiry throughout much of the recess. A lot of this new business was likely to be somewhat speculative, on the back of the AUD that had at times fallen by as much as 3.5% against the US Dollar.

Upon opening, the market quickly found an increased level, and then generally maintained it to the final hammer in the Western Region. By the end of the first day, the individual merino MPGs had risen 11-55 cents, while the crossbreds and cardings were also dearer and well sought after. Day two generally maintained the levels set the previous day, recording only small movements across the country.

Buying was dominated by the three largest Chinese top makers, as well as Australia's largest domestic trading companies. A slight re-assessment by saleroom operators was undertaken just before the conclusion of selling, as higher-than-expected auction volumes for next week became known to the trade, allowing some purchasing pres-sure to be released.

Next week sees almost 49,000 bales being offered over the usual Tuesday/Wednesday roster.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1561 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1684 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
