AU BALES OFFERED			57,196	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI & AWEX

A solid market since early December has encouraged sellers onto the market and pushed this week's national quantity to 57,196 bales. It was the largest offering in almost three years.

Included in that quantity were more than 5,000 bales sourced from Tasmania as part of a designated Tasmanian feature sale. On Tuesday, prices were noticeably lower, reducing the EMI by 23 cents. However, the stylish types from Tasmania were one of the few highlights, lifting the 16.5 MPG by 10 cents in the southern region.

As with the previous sale, the second day saw the market settle with prices for merino MPG's ranging between -12 and +25 cents.

Melbourne was again operating in isolation on the final day, and the market generally maintained the price levels of the previous day. Stylish types continued to be keenly sought and contributed to a modest 1-cent dip in the AWEX-EMI. Crossbreds were the best-performing sector in this series, with strong, widespread competition helping to push prices 5 to 15 cents higher across most microns, although heavy discounting remains evident for poorly prepared lots.

The crossbred MPGs limited the losses in the AWEX-EMI to only 26 cents. Despite the falls of this series, next week's national offering is also forecast to be high. There are currently 57,321 bales expected to be offered. Combined with this week, it will make it the largest fortnight of sales in twelve years

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1659 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1428 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
