### Note

### **Definitions:**

<sup>\*</sup> Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

<sup>\*</sup> For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

<sup>\* 10</sup> Year data is not available for some micron categories, which may result in blank spaces in the table above.

<sup>\*</sup> A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

### JEMALONG WOOL BULLETIN (week ending 16/05/2013)

UW

### MARKET COMMENTARY

One Australian Dollar = 0.981173 US as of:

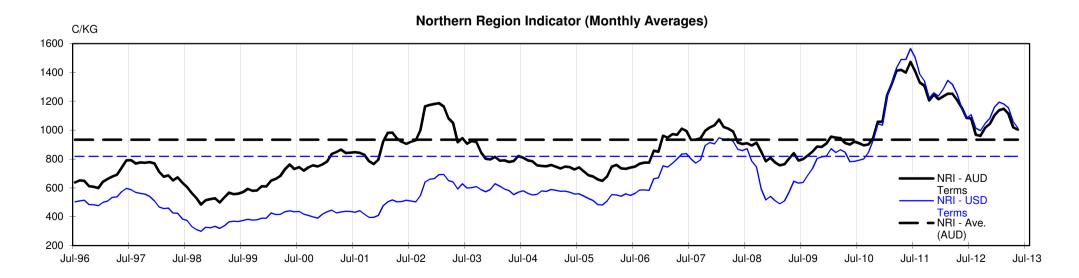

16/05/2013

NORTHERN REGION – Sale Week 46/12 (37,603 bales offered nationally)

Fresh orders in the market combined with lower volumes on offer and a cheaper exchange rate are working in wools favour. This week's Northern Region indicator rose 28 cents to close at 1037 and while most micron categories enjoyed a 30-40 cent increase, some areas posted rises in excess of 50-60 cents, with strong support for the better style and strength lots. The broader end of the crossbred market was less affected (closing firm to 10 cents dearer), while the carding market took a breather, easing by 2 cents (however despite this, Merino Cardings remain the strongest market performer, trading in the 75th percentile of the past 3 years, and 93rd percentile of the past 10 years).

74000 clean kilos traded forward on Riemann, out to November 2013, with contracts traded predominantly 21 micron, but ranging from 19-30 microns.

Less than 40,000 bales a week are now forecast for the remainder of the selling season, this combined with the new China business should augur well for wool prices in coming weeks.
