Note:

- \* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.
- \* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.
- \* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.  
Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.  
The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

**Australian Dollar 98.11 cents US as of 16/12/2010**

**NORTHERN REGION –Sale Week 24/10 (49,970 bales offered nationally)**

After an irregular start on Tuesday, buyer support increased and momentum grew as the sale progressed. Most merino fleece closed the day 5-10 cents higher, with the lower style & strength lots attracting the most attention, merino skirting's were also in demand with burrier types 10-15 cents dearer (19 to 20 microns were most affected). The oddment market didn't fair so well, with Locks, crutching's & stains all up to 10 cents cheaper. 30 to 32 micron crossbred also lost 10 cents while the 27 to 29 micron range were firm (tending in sellers favour).

On Wednesday the rush was on, with buyers trying to complete orders before the recess. 19.5 micron and finer rose 25-35 cents while 20 to 22 microns closed 20 cents dearer. All oddment categories continued to loose ground, with Locks, crutching & stains falling up to 20 cents. 27 to 29 micron crossbred closed in sellers favour as did the broader end, with 30 to 32 microns recouping 5 cents on the previous d

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
