AU BALES OFFERED		51,703	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD		48,227	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

51,703 bales were offered this week, making it the largest national offering since April last year. Despite the last two weeks having a large amount of wool for sale, the overall national quantity is still well down on the previous season. When compared to the corresponding sale week in 2018, the Y.T.D volume is down by 175,524 bales, a reduction of 16.8%.

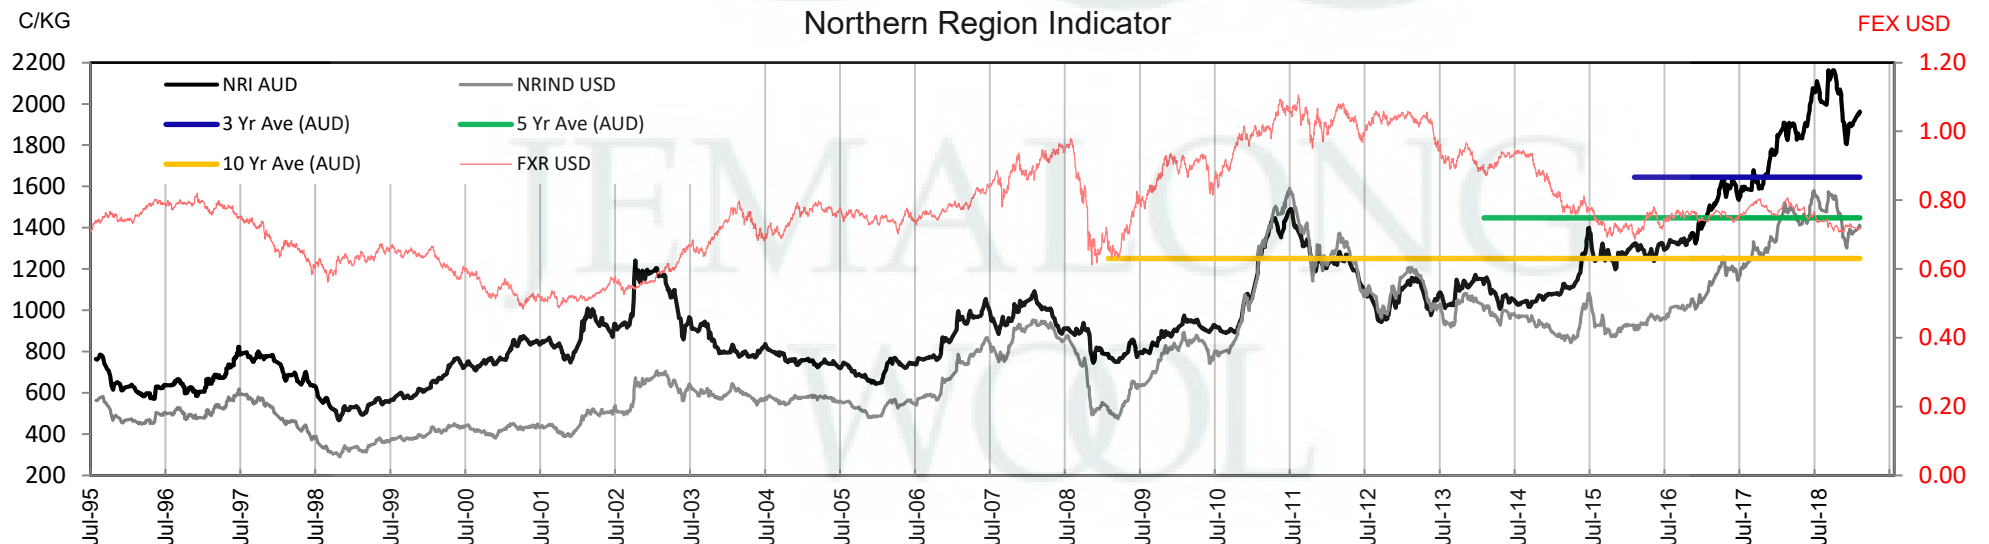

The merino fleece market was mixed in its performance. The three centres behaved slightly differently, with varied positive and negative movements recorded across the board. Although there was an inconsistent pattern, the overall trend was upward. By the close of trade the NRI had gained 12 cents, closing the week at 1,960c/kg.

Skirtings managed to record upward movements, generally between 20 and 40 cents, wools coarser than 19 micron attracted the most attention and as a result enjoyed the largest gains. Similar to the fleece, the results in the oddments varied between centres, the North and West recorded 20-30 cent rises, whilst the South posted a small reduction but again the overall trend was positive.

However, it was the crossbred sector that was the best performing sector for the week, with large gains of 50-80 cents were experienced in the 26-28 micron range.

Despite the strong market the national offering reduces next week. Most of the wool is from sheep shorn in recent weeks, as the back log of wool delivered during the break has mostly been cleared. Currently, there is 41,503 bales rostered for sale.

#### Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1968 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1436 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
