AU BALES OFFERED		42,214	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		35,028	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

In an almost mirror image of the previous series, the market recorded large falls this week, again heavily influenced by currency, this time by an upward spike in the AUD compared to the USD. The AUD closed the previous series at 59.63 US cents, on the opening day of this series it was trading at 63.43 US cents.

In contrast to the previous week, falls were expected and from the opening lot, these falls were realised. Buyer activity was best described as cautious, with buyers being very selective in their purchases. By the end of the day, the MPGs for merino fleece had dropped by 16 to 48 cents. These losses combined with falls in the crossbred, skirting, and oddment sectors, resulted in a 22-cent drop in the EMI.

When viewed in USD terms the news was much more favourable. The EMI rose by 34 US cents, this was the largest daily rise in US cents since October 2021. With minimal currency movement on the second day, the market settled. Although the market recorded overall losses, the falls were not as large as the previous day, with the Merino fleece MPGs unchanged to 17 cents cheaper, while the other sectors recorded minimal falls. The EMI fell 8 cents, closing the week 30 cents lower at 1,232. The EMI also fell in USD, losing 6 US cents for the day, closing the series 28 cents higher at 787 US cents.

Of note this week, the Sydney sale was held at the Sydney Royal Easter Show, showcasing wool auctions to the larger community. There are no sales next week as the market heads into the one-week Easter recess.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1531 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1684 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
