AU BALES OFFERED		23,623	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		22,399	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The EMI gained another 10 cents this week, closing at 1221 cents, breaking above its previous trading range of 1190–1210 cents and reaching its highest level in three months, as well as an 18-month high in US dollar terms. Volumes this week were modest, with only 23,623 bales offered in a Sydney/Melbourne-only sale (Fremantle skipping the week due to low volume).

The strongest gains came on the first day, with the Merino Fleece sector rising 5 to 10 cents. Wednesday displayed more irregular activity, particularly in Sydney, where a few small pockets of weakness were recorded in the finer microns. In contrast, Melbourne continued to firm through to the close. Stylish superfine types with in-demand specifications attracted strong buyer support in both centres during the sale. Merino Skirtings remained firm. Best-style, good-length lots with low vegetable matter continued to attract good support and are trading at solid premiums over other types. Broader Crossbreds also continued to find favour, with 28 micron adding 20 cents in Sydney, closing 30% higher year-on-year, while Merino Cardings remained firm.

Volumes rise to just over 38,600 bales next week with Fremantle returning to the national roster on Tuesday. This will be the final week of wool sales before the annual three-week August recess.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1509 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1683 for 60% of the time, over the past ten years.

Average Price of Australian Wool

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

20 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown

risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

20 Mic - Price Differentials (c/kg cln) 16/07/25

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above **'Rise or Fall'** graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The **'Monthly Price Movement'** graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

JEMALONG WOOL BULLETIN

(week ending 17/07/25)

Page 16/27

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
