AU BALES OFFERED		26,701	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		23,623																		
AU PASSED-IN%		11.5%	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																	
AUD/USD		0.7133 -1.4%

MARKET COMMENTARY Source: AWEX

This week, 28,392 bales were offered nationally (4,906 more than the previous series). Tuesday's market saw mixed results in the Eastern centres, with Merino MPGs moving from plus 21 to minus 34, leaving the EMI down 9 cents for the day. The strongest performers were 18 and 18.5 in the North, driven by strong demand for lots possessing favourable additional measurement results. In Fremantle, losses were larger because the Western region didn't suffer the falls experienced in the Eastern last Wednesday; as a result, the Western Region MPGs fell 29-70 cents, resulting in a 45 cent drop in the WMI.

On the second day of sales, only Sydney and Melbourne were in operation. Prices continued to fall, albeit at a slower rate than on the previous day. By the end of the day, merino fleece MPGs had lost up to 41 cents, with no positive movements recorded. The EMI closed 12 cents lower at 1,857, a weekly fall of 21 cents.

Falls in USD terms were larger, with the weaker exchange rate preventing larger local losses; in USD terms, the EMI lost 34 US cents, closing the week at 1,323 US.

The volume on offer next week' is forecast to be of similar size to this weeks, with 28,286 bales currently rostered for sale.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1542 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1763 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
