AU BALES OFFERED		49,905	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		45,942																				
AU PASSED-IN%		7.9%	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																			
AUD/USD		0.6571 -2.0%

## MARKET COMMENTARY Source: AWEX

This week's auction featured another substantial offering with 49,905 bales on offer, following closely behind the nearly 50,884 bales offered in the previous sale. Both weeks kicked off a sizeable start to 2024 with over 100,000 bales offered, marking it the largest starting fortnight to a calendar year in four years.

The market struggled to sustain the positive momentum observed in the opening sale last week which saw a 1-cent increase in the AWEX Eastern Market Indicator. Over the three selling days this week, the EMI registered a 17-cent decline, closing at 1196 cents. The most significant drop in prices occurred on the opening day when there was a 16-cent reduction in the EMI, the largest daily fall in five months. The Merino Fleece sector weighed heavily on the outcome with their MPGs showing a decrease of as much as 50 cents. Finer microns bore the brunt of the downturn while broader types generally saw reductions in the range of 10-20 cents.

Despite the EMI showing no movement on Wednesday, a more positive atmosphere prevailed, marked by modest increases in Melbourne and Fremantle. The Melbourne-only sale on Thursday noted only minor fluctuations, and all Micron Price Guides closed within five cents of the previous day's values. Throughout the week there was a noticeable emphasis on better-specified wool, resulting in reduced demand for less-favourable types including those with high mid-break.

Merino Skirtings reported mixed results, with some of the better types maintaining good support, while the lower spec types eased back against reduced demand. Broader Crossbreds demonstrated resilience amid the weakness in the Merino sector, firming by 5 to 10 cents. Merino Cardings made very little change, closing the sale on a firm basis. After a fortnight of large volumes, the upcoming week will see a dip to 41,733 bales rostered over two days.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1658 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1468 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
