AU BALES OFFERED		27,519	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		25,225	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

The market has had an up-and-down series, a soft start followed by a strong finish, combining for an overall unchanged result in EMI. With only Sydney and Melbourne in operation this week the national offering fell to 27,519 bales.

Buyer sentiment was again cautious from the start of the first day, and while market movements varied, the overall trend was lower. The EMI dropped 3 cents for the day. This was the ninth selling day in a row the EMI recorded a negative result. This was the longest downward run in the EMI (12 selling days), and the lowest the EMI has been since October 2020.

The second selling day was in complete contrast to the first, buyer sentiment was positive and the widespread competition helped to push prices higher. By day's end, the merino fleece MPG's had risen 2-46 cents, ending the EMI's downward run by posting a 3-cent rise gain (weakness in the other sectors prevented a larger daily rise).

The EMI closed the series at 1,107, unchanged for the series. The passed-in rate was 8.3%, 5.2% lower than the previous week. An overall clearance rate of over 90% shows the willingness of most sellers to meet the current market.

Fremantle returns next week, for what will be the final selling series before the annual three-week mid-year recess. Currently, there are 33,564 bales on offer.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1469 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 9: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
