AU BALES OFFERED		38,822	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		35,256	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWEX

This week, the national offering increased to 39,802 bales due to Melbourne's ability to conduct a three-day sale. Due to COVID-19 restrictions over the previous few months, Melbourne has been limited to two-day sales to minimise the amount of time buyer, and seller staff attend wool auctions. These restrictions were eased this week.

The market recorded a slight increase, driven mainly by the increases in the medium to broad merino fleece types. The MPGs across the country for 19 microns and broader rose by 10-31 cents. The AWEX EMI gained 5 cents for the series, closing at 1,324 cents, although when viewed in US dollar terms, it fell 9 US cents due to the weakening AUD.

A noteworthy event happened on the final day of selling in Melbourne; a large selection of certified specialty Non-Muled types came under intense buyer pressure and sold at premiums of between 100-350 cents and above similar Non-Muled types. Wools broader than 20.5 were most affected; for example, one line of 21 micron sold at 1,669 cents (against the Southern 21 micron MPG of 1,296 cents).

The oddment market was the strongest performing sector in this series. General gains of between 10-20 cents in locks, stains and crutchings helped to push the three regional Merino Carding indicators (MC) up by an average of 13 cents.

Currently, there are 41,363 bales rostered for next weeks sale.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1753 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1593 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
