\* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

## MARKET COMMENTARY

Australian Dollar

64.72 US as of 19/02/2009

### NORTHERN REGION – Sale S34/08

#### AWEX Market Comment

##### Wednesday

**Merino Fleece:** The fine microns of 18 and finer attracted good support with the better style & strength lots increasing their value along with the 20 to 21 microns. The broader end was par to slightly cheaper where as 18.5 to 19.5 microns drifted lower through out the day to finish 10 cents cheaper.

**Merino Skirtings:** The better length and low VM types were par to slightly easier while the burrier types with >5% Vm ending the day 10-15 cents easier.

**Oddments:** Locks remained solid closing in sellers favour, while crutchings and stains remained unchanged.

**Crossbreds:** were a little firmer gaining 5-10 cents with the finer end most affected. 7,543 bales were offered with 9.5% Passed-In.

##### Thursday

**Merino Fleece:** Once again it was the broader end that maintained its previous levels, with buyers paying a premium for low mid break lots. The medium to fine microns continued to drift lower despite the better style and strength wools posting similar levels to Tuesday.

**Merino Skirtings:** The fine burry types were irregular and eased around 10 cents while 19.5 microns and broader finished generally unchanged.

**Oddments:** All categories remained fully firm and unchanged at the close of trade.

**Crossbreds:** Remained firm to sellers favour with 26 to 28 microns a little dearer. 4,793 bales were offered with 8.0% Passed-In.

51,017 bales are rostered for next weeks Newcastle sale

19/02/09	Current MPG	891	745	725	702	690	665	569	560	461	484

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 6: Returns for fleece wool pr head, based on skirted weight of: 8 kg**

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 8: Returns for fleece wool pr head, based on skirted weight of: 6 kg**

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 10: Returns for fleece wool pr head, based on skirted weight of: 4 kg**
