NORTHERN REGION – Sale S38/08

AWEX Market Comment

Wednesday

Merino Fleece: It was the medium microns around 19.5 that had the greatest attraction for buyers today. 19 & 20 microns gained ground on the back of 19.5 microns lifting 10-15 cents with the odd lot up to 20 cents higher. All other microns were generally unchanged.

Merino Skirting's: Good wide spread competition had most microns up to 10 cents dearer with the fine end most affected.

Oddments: Locks were pushed even higher, gaining another 5-10 cents. Crutchings remained fully firm and stains closed 5-10 cents dearer.

Crossbreds: 28 to 30 microns slipped 3-5 cents while the few lots of broader microns gained some ground.

5,892 bales were offered with 5.3% Passed-In.

Thursday

Merino Fleece: A rising AUD meant a softer market for most microns. 19.5 were 5-10 cents easier while the rest were par to 5 cents cheaper, despite buyers paying similar levels for some of the better style & strength lots.

Merino Skirting's: Good buyer support had all descriptions maintaining their previous levels.

Oddments: Locks & crutchings closed down 5 cents while stains remained fully firm to sellers favour.

Crossbreds: Drifted lower in line with merino fleece, with most microns losing 5 cents off their previous value.

5,484 bales were offered with 7.6% Passed-In.

47,886 bales are rostered for next weeks sale. Jemalong are a later seller on Wednesday 25th March.

19/03/09	Current MPG	942	749	721	708	696	670	575	557	462	501

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 6: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 8: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 13 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 2kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Fine Wool Production (Less than 19 microns)
Million Kg greasy
