AU BALES OFFERED		41,986	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market has followed the trend of other global markets, suffering significant losses in Week 38. Melbourne opened in isolation on the first selling day and from the opening lot it was immediately apparent that buyers had significantly reduced their limits. By the end of the first day the individual Micron Price Guides (MPGs) had fallen by 29 to 58 cents. The losses continued into the second day, as buyers continually reduced their buying limits. The MPGs across the country fell by another 26 to 99 cents, with the largest losses experienced in Sydney and Fremantle, as these centres came into line with the previous days Melbourne market. On the back of these large losses, the NRI dropped by 74 cents.

The market continued to track downward on the final day, but not at the same rate of the previous two days, as buyers became more confident of the new price levels. The Eastern MPGs lost a further 3 to 40 cents, with the NRI falling by 14 cents. The NRI lost 88 cents for the series, closing the week at 1,469 cents. This was the largest weekly fall in the NMI since October last year.

As the Australian dollar fell to its lowest point in 17 years, the fall in the NRI when viewed in USD terms was more significant, it dropped by 187 USc, a reduction of over 18.6%. The market did finish on a positive note, the Fremantle region selling last recorded increases in its MPGs on the final day, of between 5 and 35 cents.

Despite the losses, the national offering increases next week to 49,874 bales, with all three centres in operation.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2138 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1564 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
