AU BALES OFFERED	42,278		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																
AU BALES SOLD	36,572		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

After reaching its highest level since June 2019 last week, the wool market was unable to sustain its upward trajectory this week. 42,278 bales were offered, 3,198 fewer than in the previous series.

From the opening lot on day one, the market was on the decline, with losses continuing throughout the day. Merino fleece MPG's generally lost 16-68 cents. The skirtings and crossbred sectors followed a similar path, while the oddments posted a small average rise. The end result was a 22-cent fall in the EMI, with the largest falls recorded in Sydney & Fremantle, as those centres did not sell on last Thursday, and subsequently did not suffer the falls recorded in Melbourne's standalone sale.

On day two, the market continued on the same path, recording losses across all merino fleece MPG's, with late selling Fremantle recording the largest falls. MPG's across the country lost 4-40 cents, with skirtings and crossbreds also losing ground. The EMI lost 10 cents for the day, finishing the week 32 cents lower at 1,751 (the largest weekly fall since October).

Next week's offering is again expected to be over 40,000 bales, with 40,909 bales currently on offer in Sydney, Melbourne and Fremantle.

Definitions:

- * A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.
Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
 - * Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.
The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years
- Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1502 for 60% of the time, over the past three years.
In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1721 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
