AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The Australian Wool Market is heading into its traditional quiet period as Autumn shearing programmes are nearing completion and many farmers start to contemplate seeding.

The slowdown in wool receivals, combined with the historically low amount of wool being held in brokers stores, has buyers concerned about securing quantity. These concerns have contributed to a high level of buyer demand. From the opening hammer this strong buyer sentiment was evident, pushing prices up across the entire merino spectrum and across all types and descriptions. Levels slowly but noticeably rose across both selling days, as buyers continually attempted to secure their share of the smaller offering. By the end of the sale prices had generally increased by 30-60 cents, pushing the NRI up by 35 cents, to close the week at 1881. As the season progresses, so too does the amount of low yielding wool coming onto the market. Wools yielding less than 65% (Dry) accounted for over half of the National offering. Due to the prevalence of these types buyers are finding it harder to average the lower yielding lots into their purchases, as a result the discounts being applied to these wools is continually increasing.

The crossbred sector also experienced strong rises, 26 through to 32 sold at levels 40-60 cents above those achieved at the previous sale, whilst 25 microns were 60-130 cents dearer. The oddment market has risen for the fourth consecutive week. Prices generally rose by 20-60 cents pushing the three carding indicators up by an average of 31 cents. In the last month the three indicators have risen by an average of 108 cents.

Next week quantities slightly increase, currently there is 43,648 bales rostered for sale in Sydney, Melbourne and Fremantle.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1785 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1381 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
