AU BALES OFFERED		20,756	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		19,637																					
AU PASSED-IN%		5.4%	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																				
AUD/USD		0.6504 0.1%

MARKET COMMENTARY Source: AWEX

The wool market has risen for the penultimate sale of the season and in welcome news, this rise was driven by market conditions rather than currency. Fremantle did not hold a sale this week, reducing the national offering to 20,756 bales (making it the smallest sale of the season).

The small offering attracted strong buyer support and although the selection was limited, it attracted spirited bidding, which in turn resulted in a generally dearer market. By the end of the series, the individual MPGs for Merino fleece had mostly gained ground, with the biggest rise being 24 cents for 18.5 & 19 microns. The very limited offering of fleece 16 microns & finer, continues to make that end of the market difficult to quote, and the only other red on the page was 19.5 microns which fell 22 cents in the North.

The EMI gained 10 cents for the week, closing at 1,207. The EMI also rose in USD terms, adding 6 US cents. The crossbred sector continues to strengthen, adding further increases to those achieved over the previous weeks. The recent rise in the crossbreds is best highlighted by viewing the Southern MPGs. In Week 45 (7th of May) the 26 MPG was 588, this week it closed at 652, an increase of 10.8%. 28 micron gained 7.7%, and 30 micron 12.5% for the same period. To put this into perspective the best-performing Merino is 17.5 microns, which has gained 4.1%.

Next week is the final sale of the season, and with Fremantle back in the mix, the national quantity is forecast to rise to 32,648 bales.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1516 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1684 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
