AU BALES OFFERED		33,103	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		23,753	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWEX

Last week's market movements discouraged many sellers from offering, as a result only 33,103 bales were put before the trade this week. However, despite the reduced offering the market continued to trend downwards, which further dented buyer confidence and pushed prices lower.

Price reductions were mainly on the first day of selling, with the individual merino MPG's shedding 20-102 cents. Fremantle (who only required one selling day) Passed-in 58.2% of their offering, which resulted in only 1,707 bales being sold, which was the lowest weekly figure since AWEX records began (1997/98).

On the eastern seaboard, the EMI lost 40 cents on the first day, which prompted many sellers to withdraw their wool on the second day, this reaction pushed the second day's offering well below the expected volume. The lower volume on offer, combined with a high passed in rate (24.2%) further reduced supply, prompting increased demand for the wool that remained. As a result, the market steadied, with general MPG movements ranging between -10 and +20 cents.

While the EMI finished the day 3 cents higher, it lost 37 cents for the series. The lower prices, combined with no sales in WA next week has resulted in only 32,337 bales being forecast for sale next week.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1810 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1545 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
