AU BALES OFFERED		27,698	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		26,190	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI

Following on from the small gains extracted last week, wool prices remained relatively stable at this week's wool auctions. In US dollar terms the market pushed 1.5% higher, indicating that for this week at least, overseas users were able to pay a bit more to buy our wool.

Selling started off very keenly, with 5-10 cnet gains across most types and descriptions. Exporters had reported a smattering of business available from predominantly Chinese interests, but again at very keen price levels and volume was not that large. All three selling centres operated on Tuesday and the usually good sign of the last centre to finish selling for the day (Fremantle) getting the most gains out of that renewed and slightly stronger buying interest.

The steam was taken out of the market overnight, as inquiry dried up almost completely and conversion to new written contracts was near nil. Overseas manufacturers and traders appeared to sit back to reassess the new price levels in both US dollar and Chinese yuan terms. This certainly spooked the spot markets on Wednesday as most wools reversed quickly back to the levels of the previous week's close.

Australia's largest wool exporting entity returned to the top of the Merino and cardings purchase lists this week. This activity certainly contributed to the better confidence of their competitors, who sometimes look to that company's actions to gauge direction. Competition from China's top two top-makers was evident and strong but appeared to be more price-sensitive than the trading operators.

Next week sees 34,000 bales rostered. The Northern and Southern markets will operate over two selling days, while the West will only sell on Tuesday.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1469 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
