**Note:**

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.038482 US as of: 21/03/2013

NORTHERN REGION –Sale Week 38/12 (48,646 bales offered nationally)

Wednesdays market drifted lower as buyer support waned. Finer microns came under the greatest pressure losing 25-35 cents, while the medium microns lost 20 cents and the broader microns 15 cents, with the higher midbreak lots attracting solid discounting. All merino skirtings closed 20 cents cheaper despite buyer support for bellies. Locks, stains & crutchings levelled out to remain unchanged, after a promising start, while 26 to 30 micron crossbreds finished 10 cents lower. 6.4% PI

Thursdays market remained generally firm with 18.5 to 19 microns the only area to ease slipping by 4 cents, leaving all other microns firm and unchanged. A small offering of merino skirtings also had all descriptions fully firm and unchanged. Locks ended the day fully firm, while stains & crutchings also remained unchanged. In the crossbreds, 27 to 28 microns eased 10 cents while 29 microns and broader remained fully firm. 9.8% PI.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
