Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 0.919245 US as of: 20/06/2013

NORTHERN REGION –Sale Week 51/12 (24,888 bales offered nationally)

A small national offering (with no sales in the west) saw only 24,888 bales on offer. Wednesday's market edged slightly higher on the back of a 10-15 cent rise at the finer end.

Thursday's market was mixed with some buyers rattled by the rapid fall in the AUD overnight, however despite this the market was generally only 15 cents cheaper for medium to broader microns, leaving the rest of the market reasonably firm. 18 microns and finer closed unchanged to slightly dearer as did merino skirtings (despite steadying after a strong start). Oddments were firm to slightly dearer and with carding buyers caught in a "short position" locks & lamb's wool continued to sell at extremely healthy levels. 27 to 29 micron crossbred remained firm, however the broader end closed 10 cents dearer (up 15-20 cents for the week).

Approximately 340 bales of 21 microns traded forward for the week, with prices for September –December 2013, generally unchanged compared to last weeks trades.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
