Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.038964 US as of: 20/09/2012

NORTHERN REGION –Sale Week 12/12 (43,092 bales offered nationally)

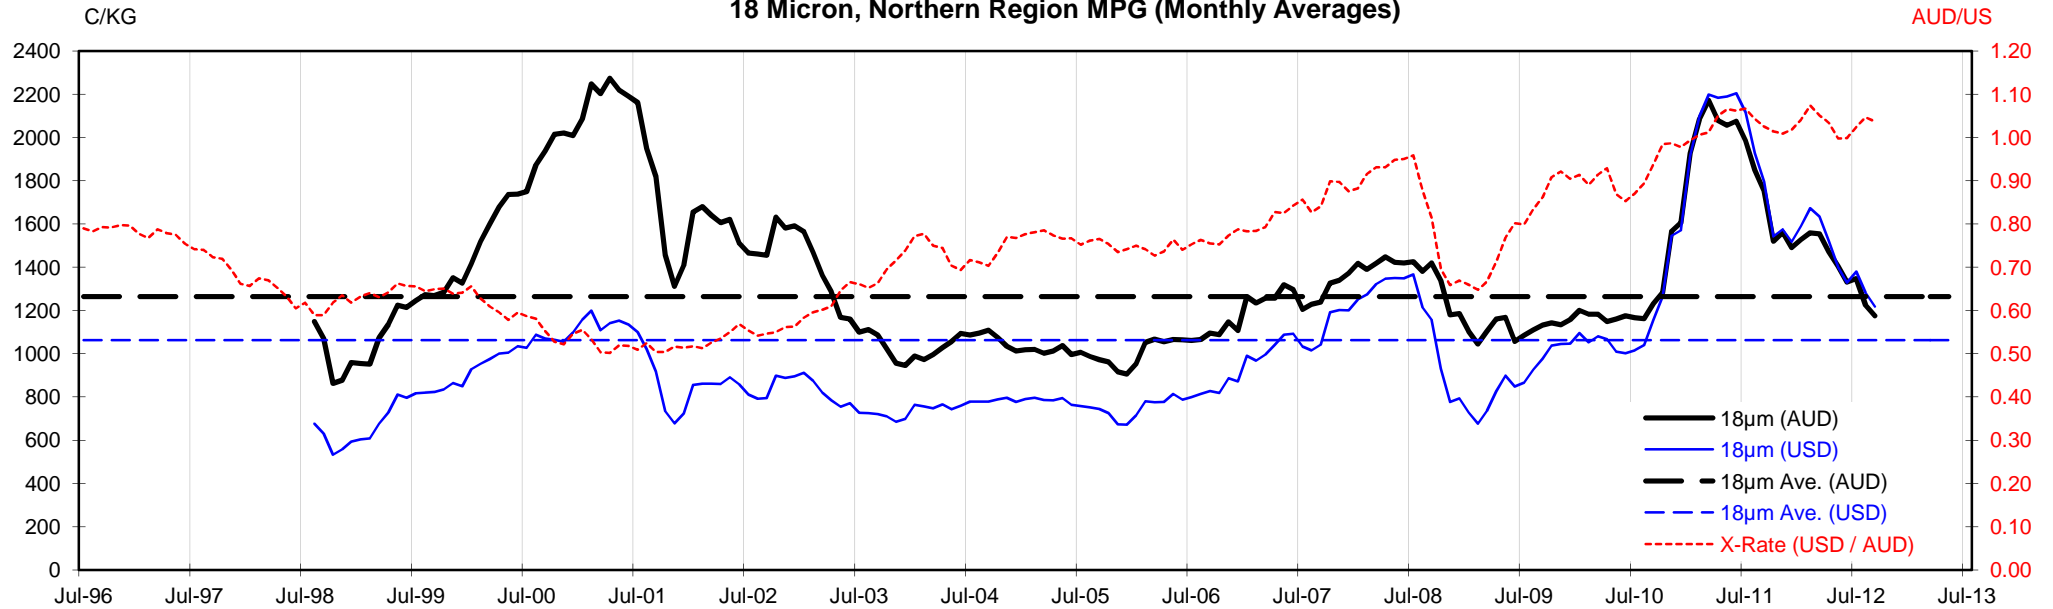

Wednesdays market saw the 18.5 micron and finer end close par to 5 cents cheaper. The better style and strength types received good support however the lower style lots were lacking in interest and as a result contracted in line with the rest of the market. Medium to broader microns eased, contracting 10-15 cents off last weeks levels. Merino skirtings remained generally unchanged with the less than 5% Vm types attracting good competition while the higher Vm lots containing 6-8% Vm were irregular through out the day. Locks eased 5-10 cents for 19 microns and broader while crutchings were firm and stains 10 cents dearer. A small offering of crossbreds left 27 to 30 microns unchanged. 9.0% Passed-In.

Thursdays market continued to drift lower despite the small offering. Medium to fine microns were less affected closing 3-5 cents lower, while 20 to 22 microns all retreated 5 to 10 cents. Skirtings attracted good support with the lower Vm types lifting by 10-20 cents while the higher Vm lots with 5-8% Vm remained firm. In the oddments, washing locks gained 10 cents while carbo types were around 5 cents dearer. The limited number of stains and crutchings had these categories unchanged on a nominal basis. Mixed results in the crossbred market had 27 to 29 microns firm to slightly dearer, however 30 microns eased by 5 cents. 10.1% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
