Note:

- \* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.
- \* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.
- \* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.  
Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.  
The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

**One Australian Dollar = \$ 1.02 US, as of 20/10/2011**

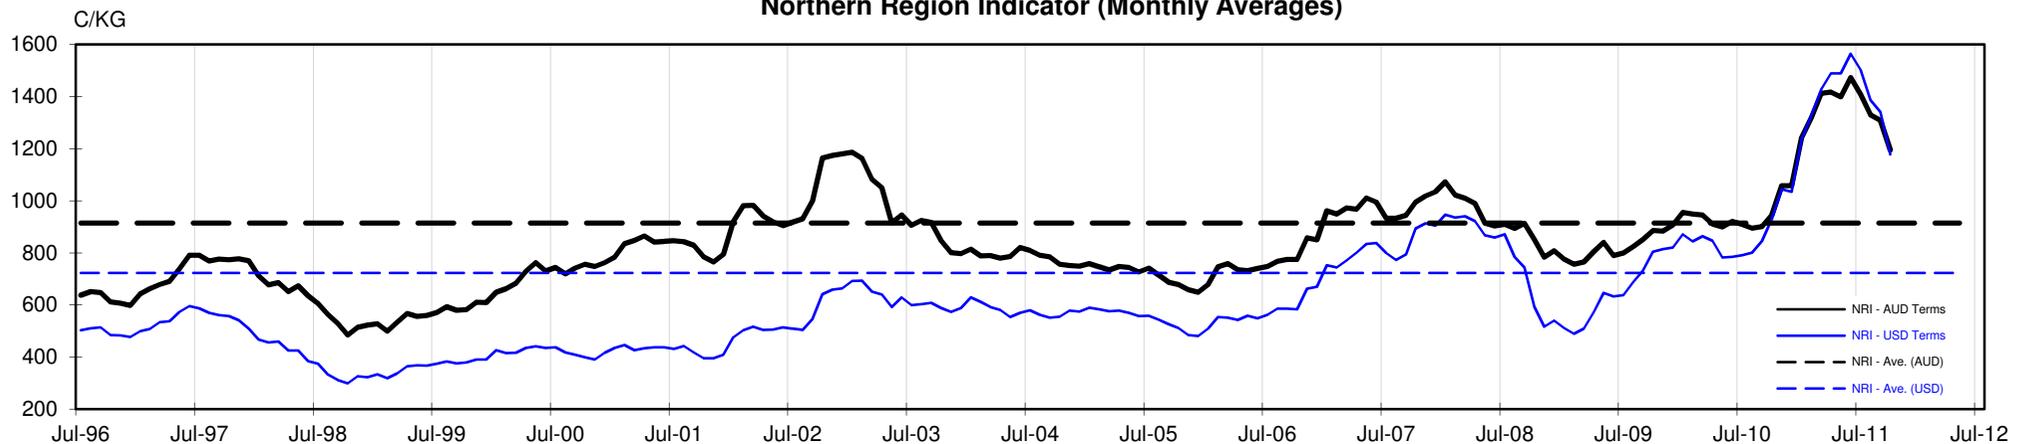

**NORTHERN REGION –Sale Week 16/11 ( 49,666 bales offered nationally)**

On Tuesday - In Newcastle on an offering consisting predominately of 18 microns and finer, spinners to best styles, 16 micron remained firm while 17 to 18 microns eased 5-10 cents, leaving 18.5 to 21.5 microns to drift 15-20 cents lower. In the skirtings, 18 microns and finer remained generally unchanged, while a smaller selection of 19 microns eased 10 cents. Locks had mixed results with 18 microns & finer unchanged while 19 to 20 microns closed 20 cents cheaper. Crutchings & stains also remained unchanged on a bulky selection. Crossbreds eased across all microns with 26 to 30 microns 10 cents lower than last weeks close. 15.9% PI

On Wednesday - In general the market was well supported, with spinners styles par to dearer for 17 microns and finer, however the lower style 17 to 17.5 micron lots finished 20 cents cheaper. 18 microns and broader eased up to 6 cents. In the skirtings, competition was wide spread on a selection where < 3%Vm types were restricted to 18.5 microns and finer while the burrier lots (5-9%) Vm extended to 19.5 microns, resulting in a very firm market with 18 microns tending in sellers favour. Support for locks improved as the sale progressed and the offering expanded down to 19 microns, leaving 17 to 19 microns fully firm. Crutchings & stains remained unchanged on a limited and fine selection. 17.8% PI

On Thursday - A solid closing note had spinners styles maintaining buyer support for 17.5 microns & finer, despite the lower style & strength types easing slightly. 18 to 20 microns were generally 5-10 cents dearer, while the broader merino categories were insufficient to quote. Wide spread competition had all skirting descriptions fully firm, tending in sellers favour, with 16.5 microns attracting strong interest along with the burrier lots (>5% Vm). 17 to 18 micron locks eased 10 cents, while the finer & broader microns were firm. Crutchings and stains also remained unchanged on a limited offering. A small offering of crossbred wool, had 27 to 29 microns remaining unchanged on a nominal basis. 11.5% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
