MARKET COMMENTARY

This week saw just over 34,000 bales offered nationally. The market reacted with further price rises, leaving the NRI 13 cents dearer for the week at 1372 c/kg.

Unlike in recent sales where it has been the finer microns enjoying most of the price rises, this week saw gains across the entire merino micron spectrum, with 16.5 to 23.0 microns enjoying rises of between 15 and 30 cents, and again premiums were evident for the lower CVH lots.

Merino skirtings were generally 20 to 30 cents dearer for the week, with the most buyer interest centred on the FNF (<2%) stylish lots. Merino cardings received excellent buyer support on a limited offering, with rises of between 15 and 25 cents recorded for the week. A large stylish selection of washing lambs offered in Fremantle attracted very strong competition and as a result were quoted up to 50 dearer compared to the previous sale.

The crossbreds market remained generally unchanged on a limited offering.

Next week's national offering is significantly larger with nearly 45,000 bales on offer.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1385 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1256 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
