Note

Definitions:

^{*} Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

^{*} For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

^{* 10} Year data is not available for some micron categories, which may result in blank spaces in the table above.

^{*} A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

U

MARKET COMMENTARY

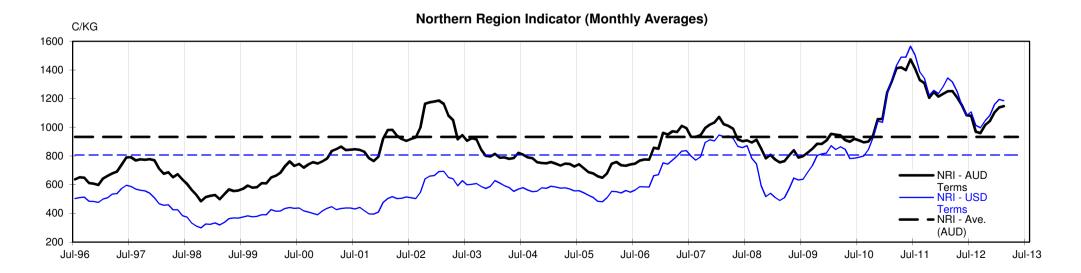

One Australian Dollar = 1.026257 US as of:

21/02/2013

NORTHERN REGION -Sale Week 34/12 (53,660 bales offered nationally)

Wednesdays market saw some mixed results, with the fine microns retracting while the medium to broader end rose. 19.5 to 22.5 micron increased by 25-30 cents, bringing their levels in line with the previous days sale in the south, 18 to 19 microns were up to 15 cents dearer, while the finer microns suffered reductions of 20-30 cents. Solid buyer support did however lift most skirting descriptions 10-20 cents with the focus on 19 micron and broader lots with 5-8% Vm. In the oddments, locks, stains and crutchings all remained unchanged, as were the crossbreds on a smaller offering. 4.7% PI

Thursdays market retracted across the board, with buyers heavily discounting the higher mid break lots, while the better strength and lower mid break types were least affected. Merino fleece in general lost around 15 cents with some areas up to 20 cents cheaper. Low Vm skirtings remained relatively unchanged, while the burrier lots with >5% Vm were 10 to 20 cents cheaper for 19 micron and finer. Locks remained fully firm while crutchings & stains finished 10 cents cheaper. 27 to 29 micron crossbred remained unchanged while 30 micron and broader closed slightly easier. 7.2 % PI.
