Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.015460 cents US as of: 21/06/2012

NORTHERN REGION –Sale Week 51/11 (**22,600** bales offered nationally)

Wednesdays market saw a high clearance rate of 93.2%. Fine microns were generally unchanged, medium microns gained 10 cents, while the broader end was only just there (on a limited offering). Widespread competition had all skirting descriptions fully firm, while 19 micron, 5% Vm types managed a rise of 5-10 cents. In the oddments, locks remained unchanged, crutchings were irregular and stains were firm. Crossbreds remained unchanged on a nominal basis for 28 to 30 microns.

Thursdays market found some strength with the medium to fine microns attracting the main buyer focus. 18 microns and finer rose 30 cents, 18.5 to 20 microns were 15-20 cents dearer and 21 microns and broader were 5 to 10 cents dearer. Good competition had most merino skirting descriptions 10 to 20 cents dearer, with 19.5 microns and finer with < 5% Vm, most affected. Locks ended the day very firm to a little dearer, while crutchings and stains remained unchanged. Crossbreds followed the general market trend and rose 10 to 15 cents for 28 microns and stronger. 3.9% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
