**MARKET COMMENTARY** Source: AWEX

The market has returned from the mid-year recess strongly, largely attributed to rises in the merino fleece sector. The first sale after the recess is traditionally a larger one; this year was no different, with 41,303 bales offered (making it the largest sale since the Easter Recess). The EMI added 8 cents for the series, closing at 1,247. The EMI has now been on an upward trajectory for eight consecutive selling days (starting on the 8th of July). Since then, it has gained 39 cents ( 3.2%) and is now at its highest point since April.

Currency had a lot to do with the market movement this week. The AUD dropped 1.9% against the US over the break, giving exporters more bang for their buck, leading to higher prices locally.

Next week's offering falls dramatically, as the backlog of wool accumulated during the recess was mostly cleared in this week's sale. There are currently only 30,596 bales on offer nationally next week.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1505 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1684 for 60% of the time, over the past ten years.

**Table 4: Riemann Forwards, as at: 20/08/25** Any highlighted in yellow are recent trades, trading since: Thursday, 14 August 2025

## Average Price of Australian Wool

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a

The top chart displays the difference between market high and low prices. The left y-axis represents AUD (0 to 3000), and the right y-axis represents USD (0 to 140). The x-axis shows time from March 2008 to June 2013. The legend includes: 18 AUD (black solid line), 18 USD (grey solid line), 3 Yr Ave (AUD) (blue solid line), 5 Yr Ave (AUD) (green solid line), and a yellow horizontal line at approximately 1800 AUD. The bottom chart shows two metrics: 18 Mic (black solid line) and <18.5 Mic (grey dashed line). The left y-axis ranges from 0 to 140, and the right y-axis ranges from 0 to 18. Data points are labeled with values in blue (for 18 Mic) and grey (for <18.5 Mic).

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 12: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 14: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
