AU BALES OFFERED		33,890	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD		31,997	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

This week's market recorded solid rises, on the back of strong demand. Talk amongst the trade early in the week was that the market could be up to 50 cents dearer when it opened. This talk came to fruition from the first hammer. Spirited bidding from a wide range of exporters helped to push prices sharply higher, this intense competition was maintained all the way to the final lot in the Western market; and by the end of the day, the merino MPGs had risen by 37-90 cents. These rises combined with overall gains in the other sectors, helped to push the AWEX Eastern Market Indicator (EMI) up by 50 cents. This was the largest daily rise in the EMI for the 2021/22 selling season and the largest rise since January.

The intensity of the first day could not be sustained into the second, resulting in a more subdued buying approach throughout the final day. Some prices eased slightly while others continued to strengthen, as reflected in the merino MPGs which ranged between -27 and +15 cents on the final day. The EMI lost 4 cents for the day, closing the week at 1,369 cents, an overall gain of 46 cents for the series.

A notable event of the series was a line of 12.1-micron fleece which achieved a price of 15,000 greasy c/kg. This was by far the highest price of the current season and the highest price achieved in over 6 years.

The higher prices achieved this week has enticed more sellers to the market, pushing next week's national offering higher, with 45,755 bales currently rostered.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1768 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1577 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
