AU BALES OFFERED	43,497		* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD	42,769		* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWI

This week's selling saw the market push higher again, consolidating on last week's strong gains. As with last week, the majority of the rise was recorded on Tuesday, with solid but more cautious buying on the second day of selling. Overall, prices strengthened across both days, with the EMI finishing 41 cents dearer at 1,689 c/kg, while the WMI gained 32 cents to close at 1,878 c/kg.

Merino and crossbred wools found solid support, with gains recorded across both sectors. Fine Merino fleece ( $\leq 19.0\mu\text{m}$ ) gained 30-35 cents, while medium Merino types ( $19.5\text{--}24.0\mu\text{m}$ ) finished 25-30 cents dearer. Crossbred wools recorded a particularly strong result, ending the week 35-40 cents higher, with cardings improving by 15-20 cents.

Buying support this week was led primarily by the Australian export sector, reflecting strong offshore order coverage through the main fleece, skirting and oddment categories. The presence of direct Chinese buying activity, alongside broad exporter competition, reinforced a confident demand tone and helped maintain upward price momentum across the sales.

The Australian dollar continued to firm this week, with AUD/USD trading near 0.68, supported by improved risk sentiment and a steady RBA policy outlook. A stronger AUD may temper some export-side price support; however, currency conditions remain broadly favourable for demand.

As sellers responded to last week's strong market, this week's offering rose to 43,497 bales (the largest offering, season-to-date). Despite the increased supply, the market was able to absorb the volume and continue to push higher, supported by a high clearance rate reflecting solid engagement from both buyers and sellers.

Next week's sale will again feature a larger offering of 43,997 bales, and the market's ability to maintain current levels will provide an important indicator of offshore support and buyer depth, particularly ahead of the mid-February auction recess for the Chinese New Year, which will further tighten short-term availability. Next week's sale days change to Wednesday/Thursday to accommodate Monday's Australia Day Public holiday.

Definitions:

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1507 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1710 for 60% of the time, over the past ten years.

**16 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

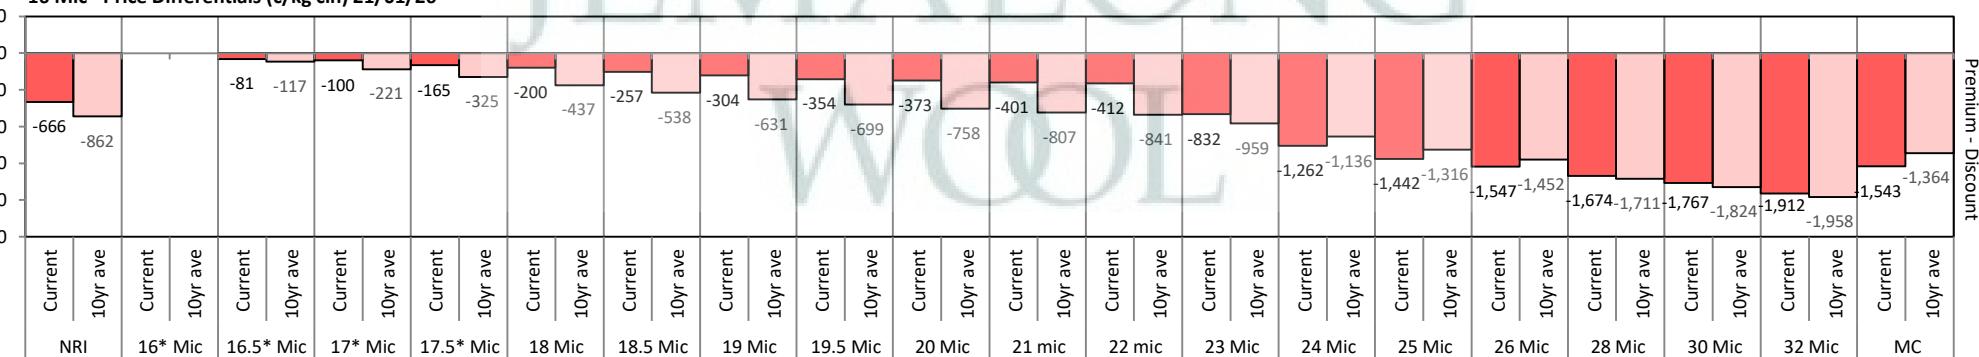

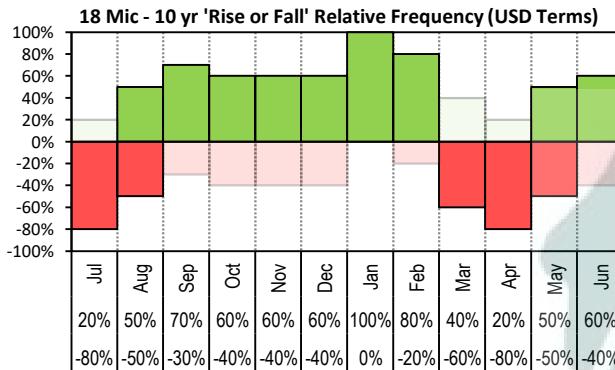

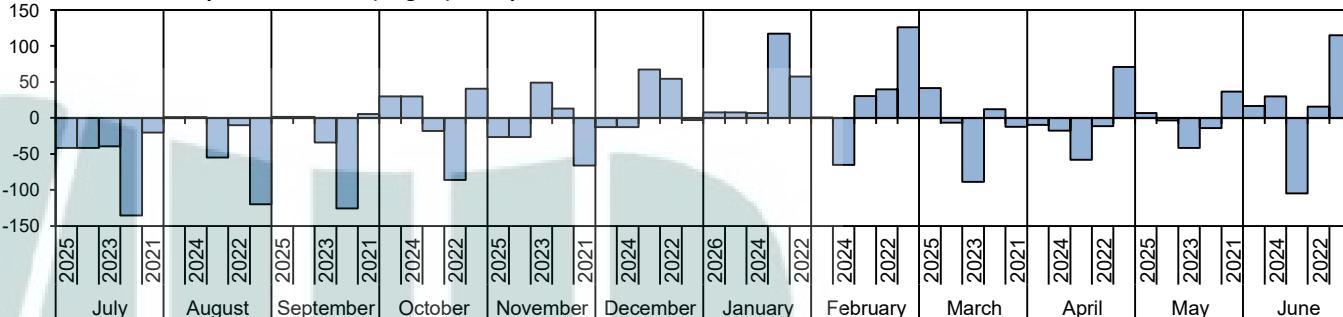

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

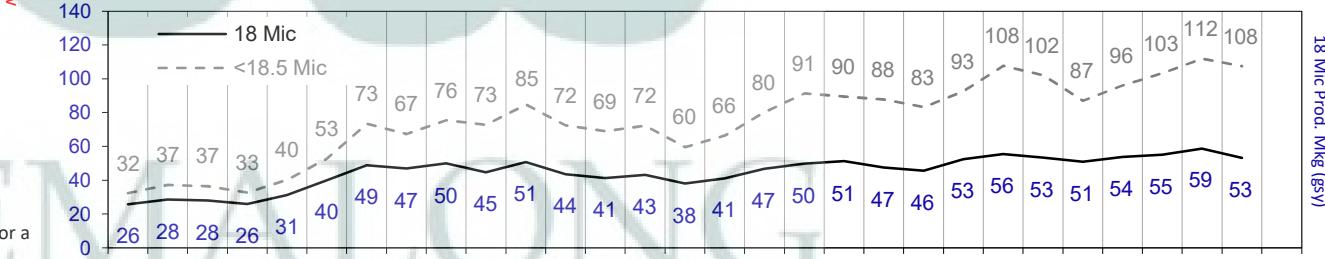

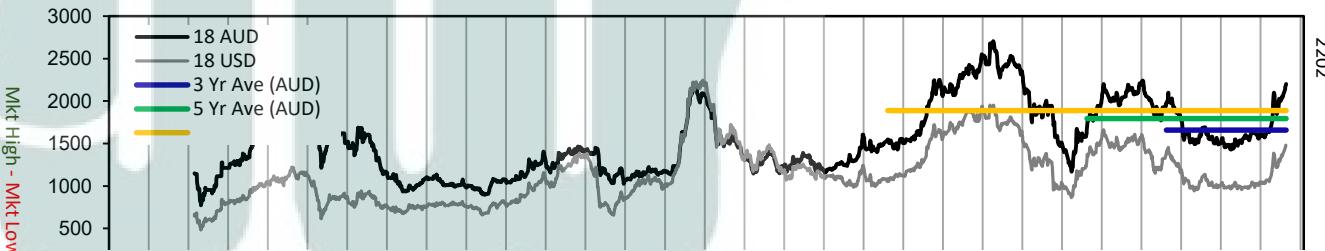

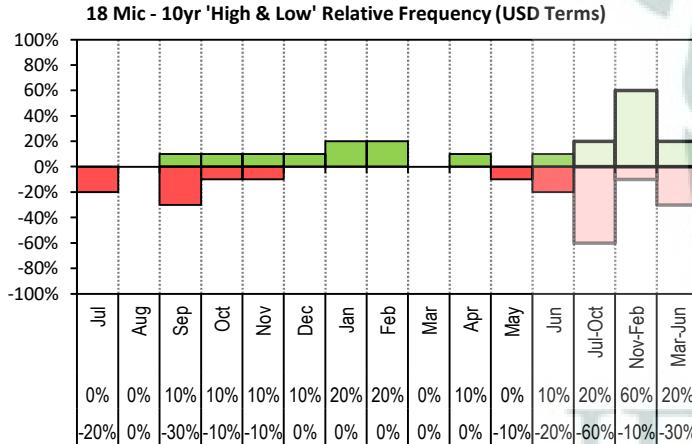

The above graph, shows how often the '12 month high & low' have been achieved for a

**16 Mic - Price Differentials (c/kg cln) 21/01/26**

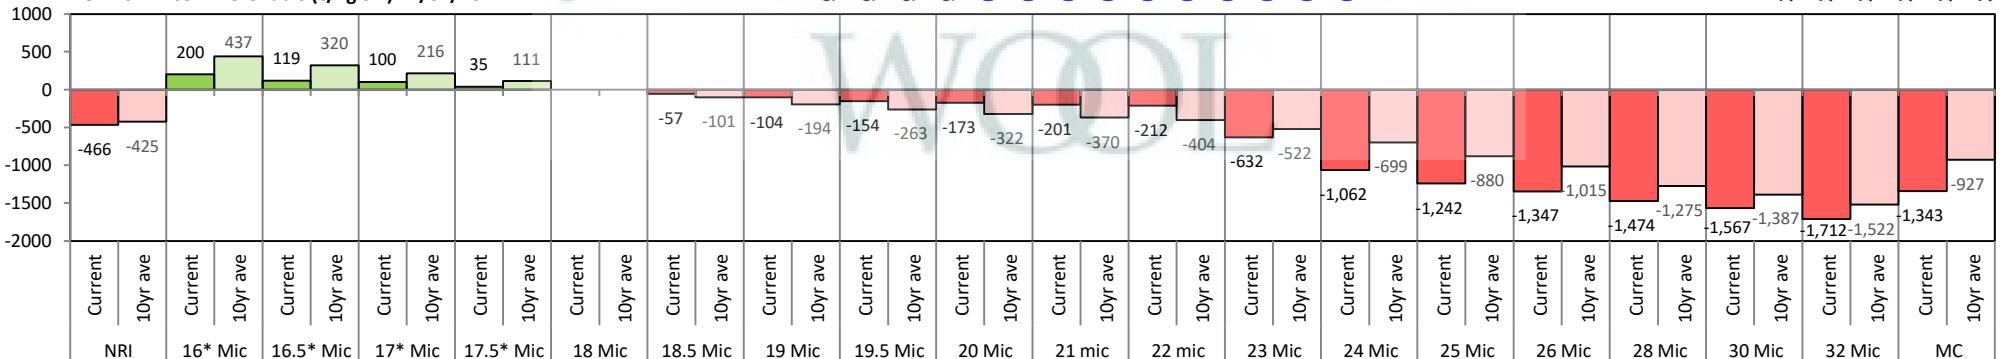

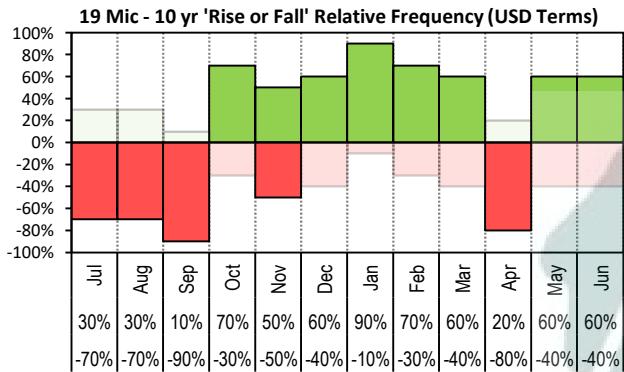

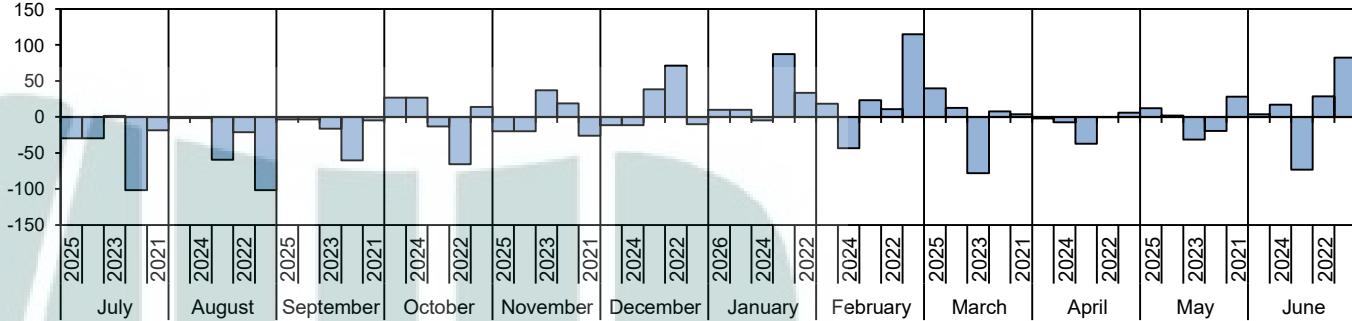

**18 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

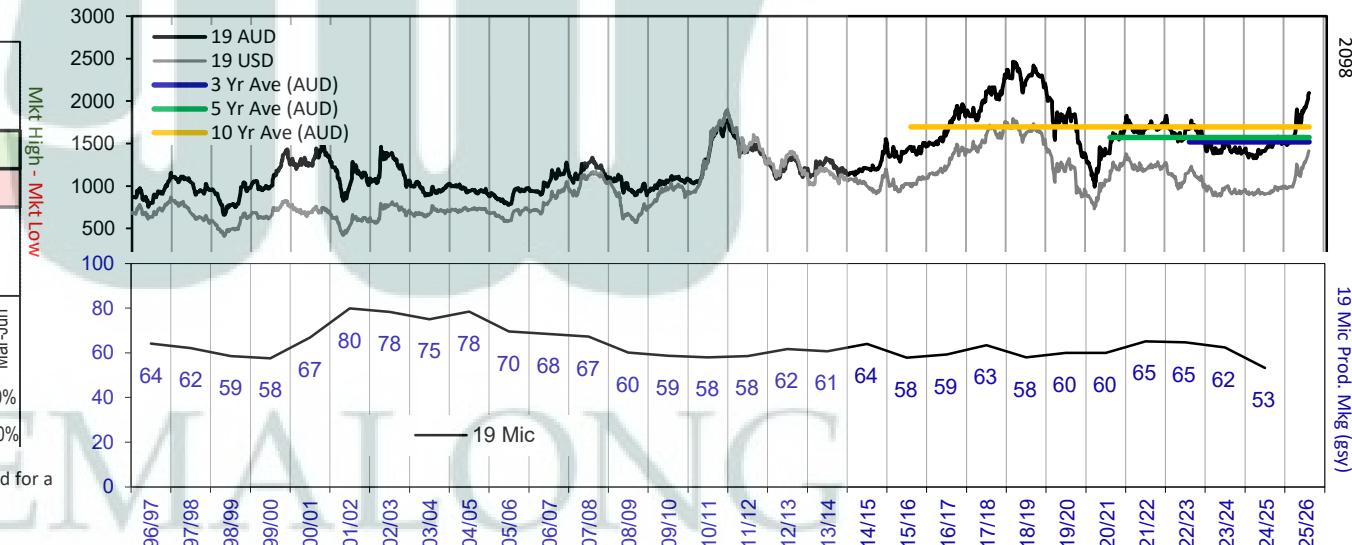

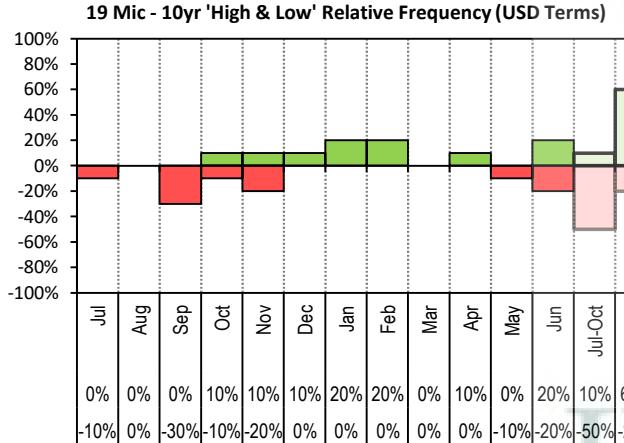

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

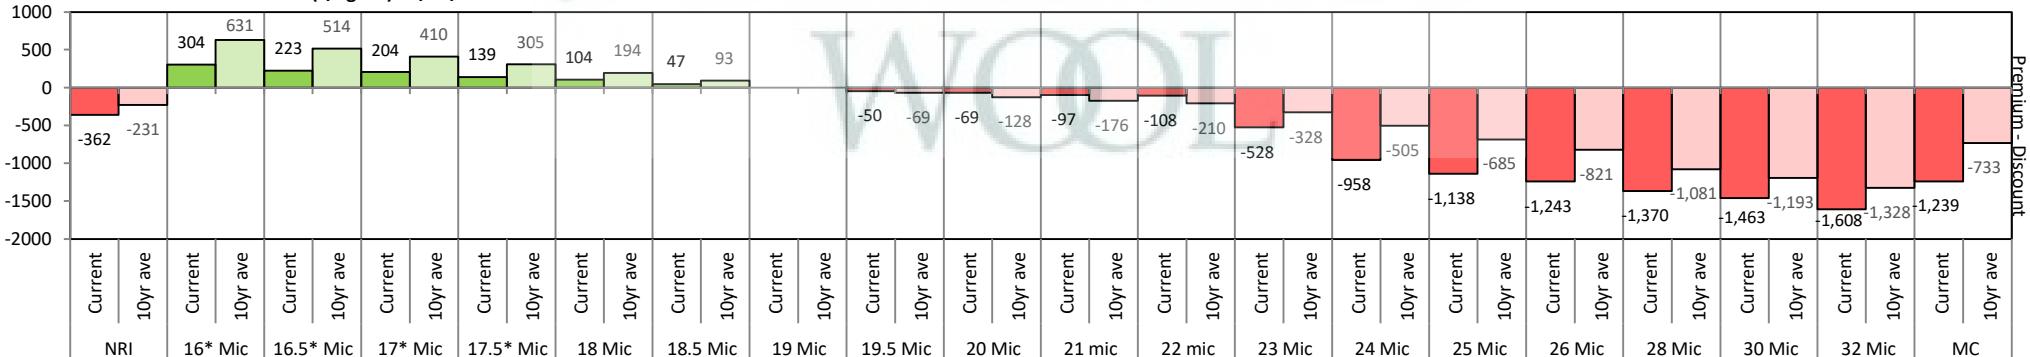

**18 Mic - Price Differentials (c/kg cln) 21/01/26**

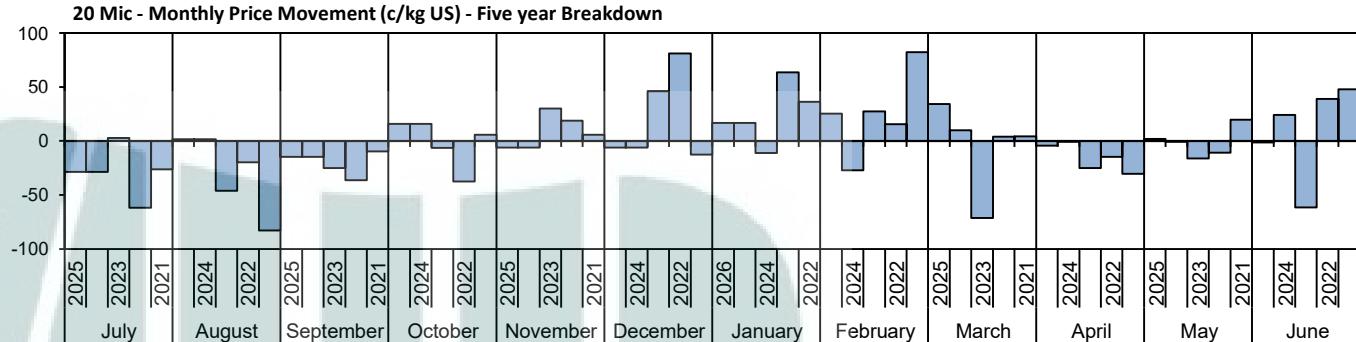

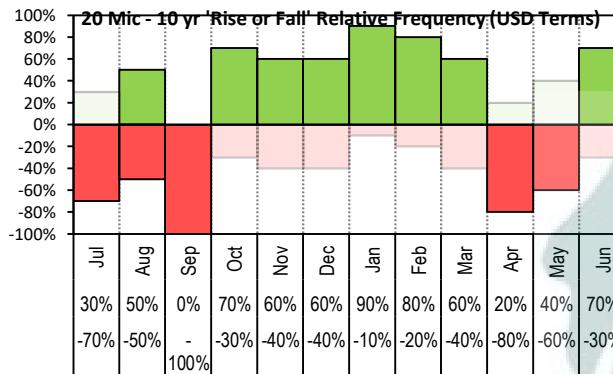

**19 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

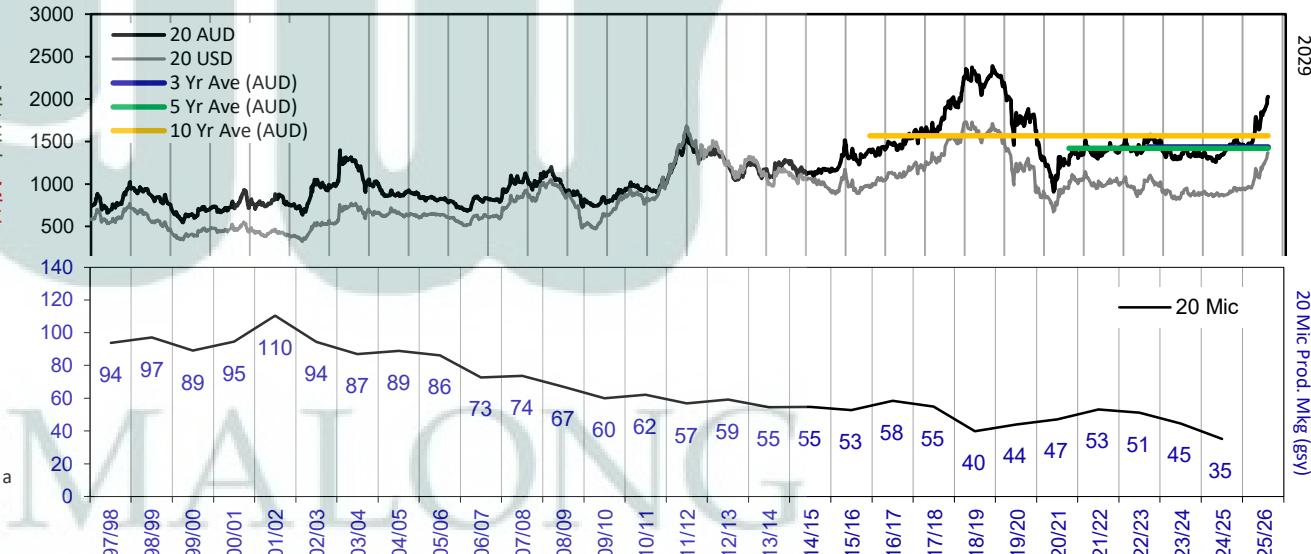

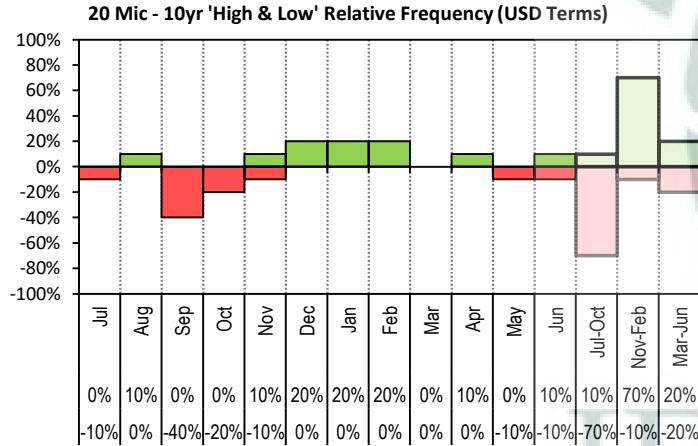

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

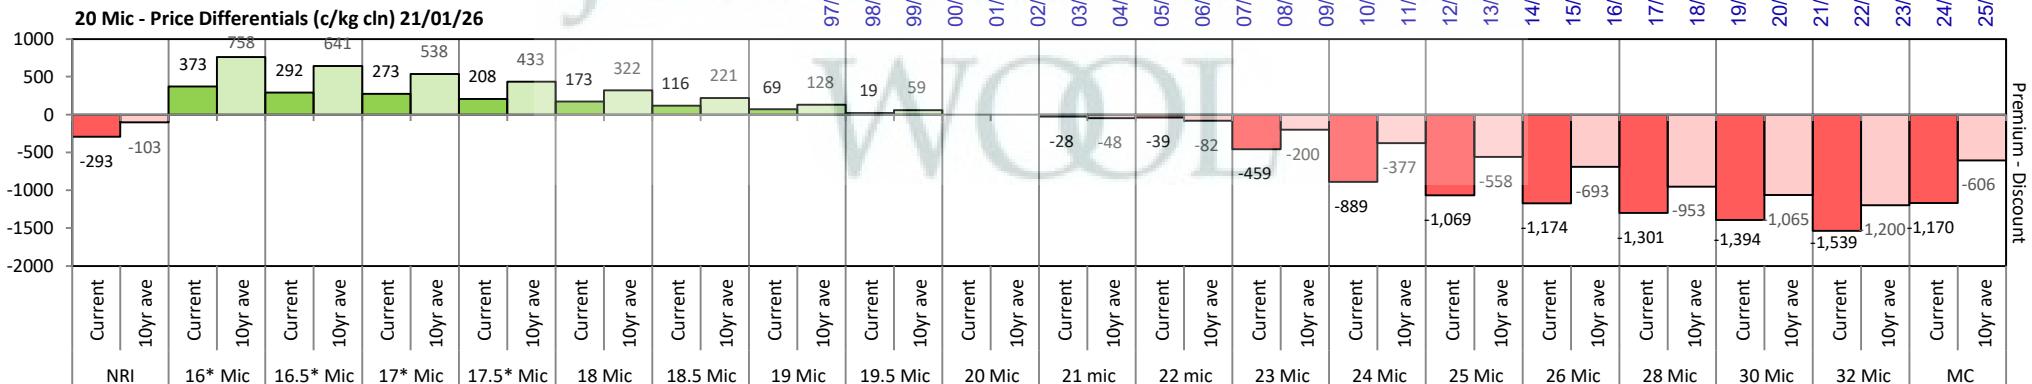

**19 Mic - Price Differentials (c/kg cln) 21/01/26**

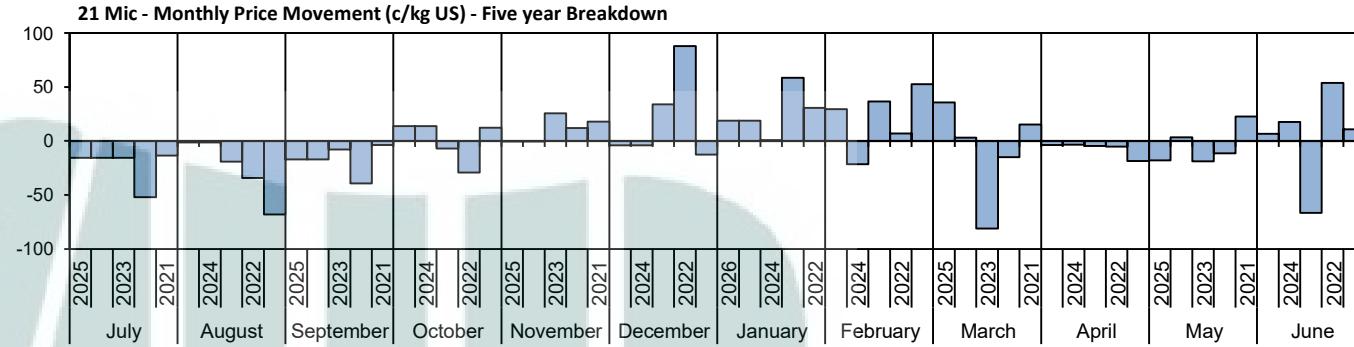

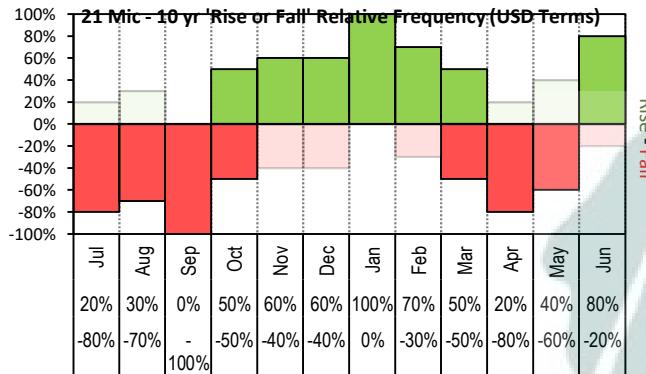

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

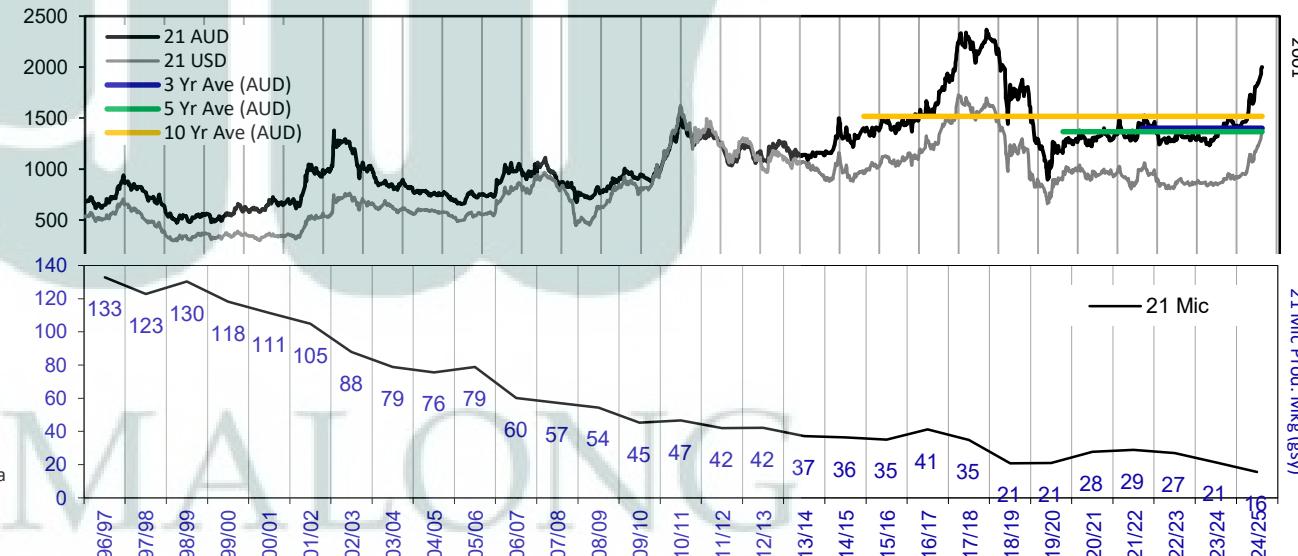

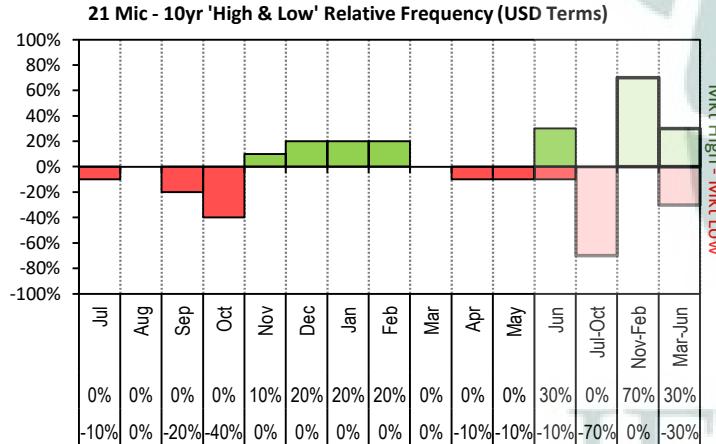

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

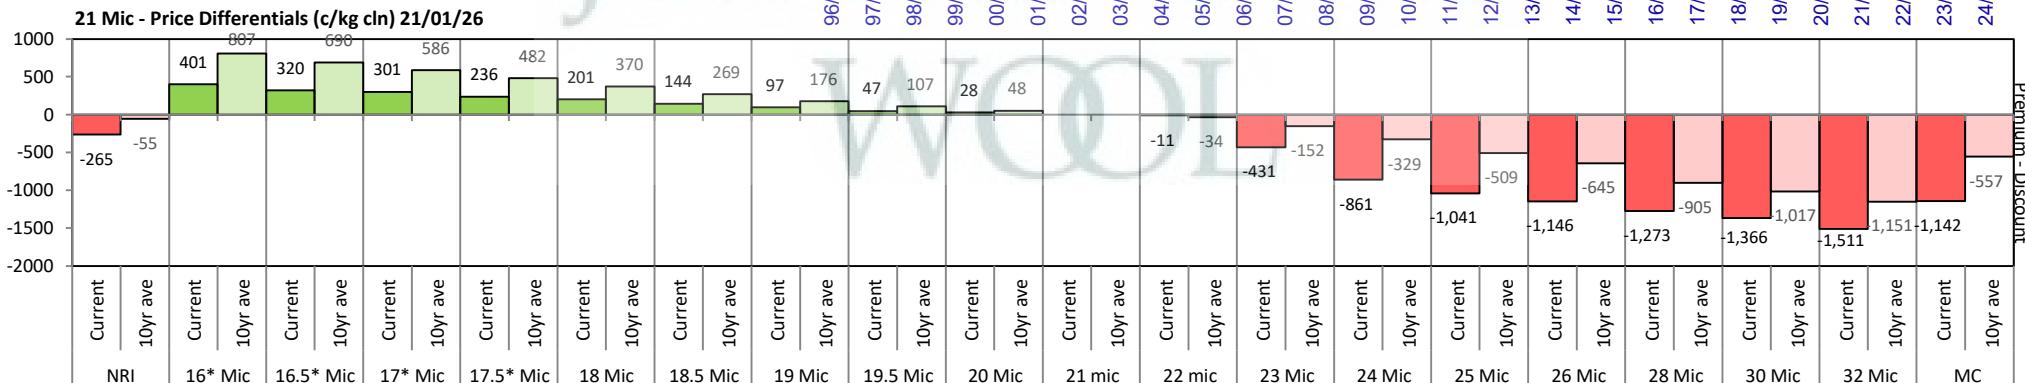

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

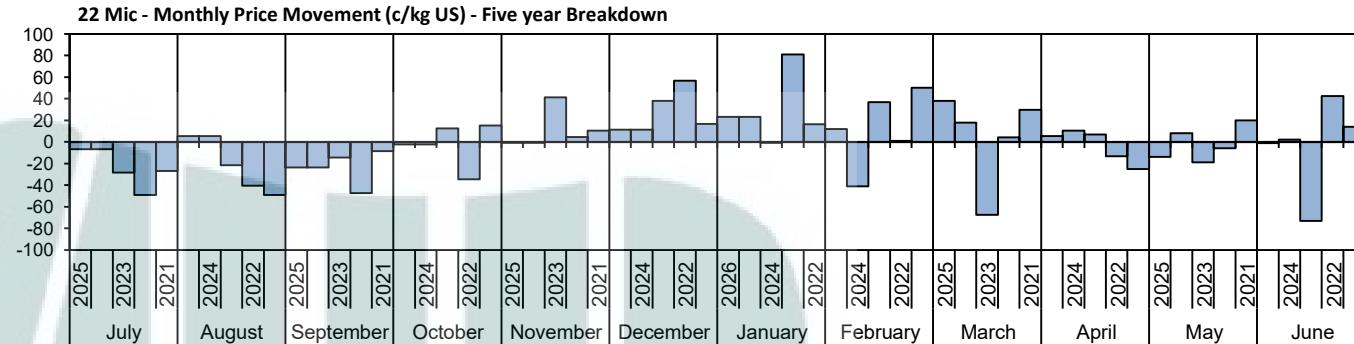

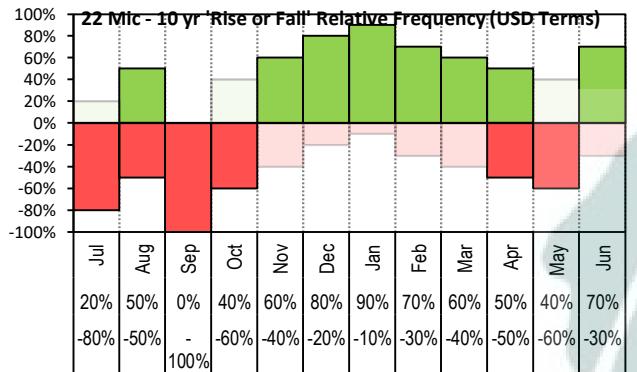

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

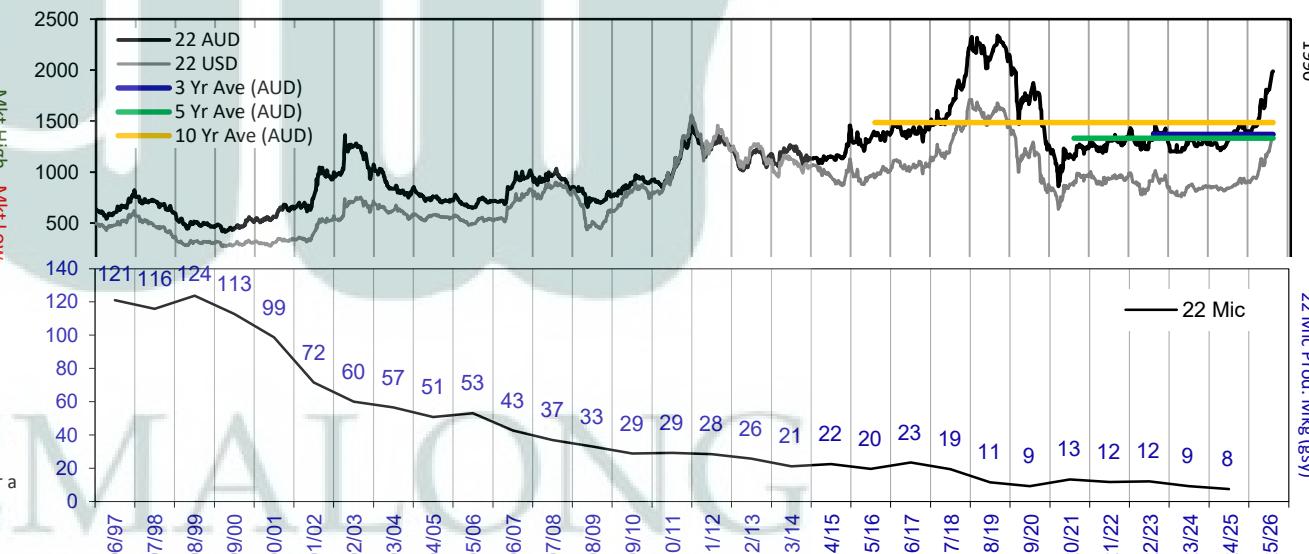

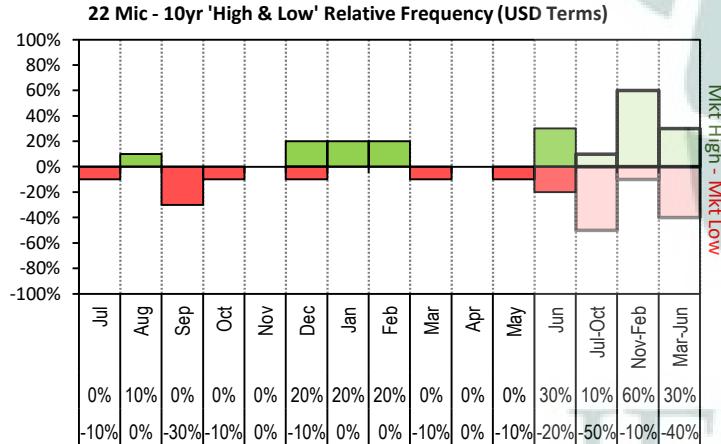

## JEMALONG WOOL BULLETIN

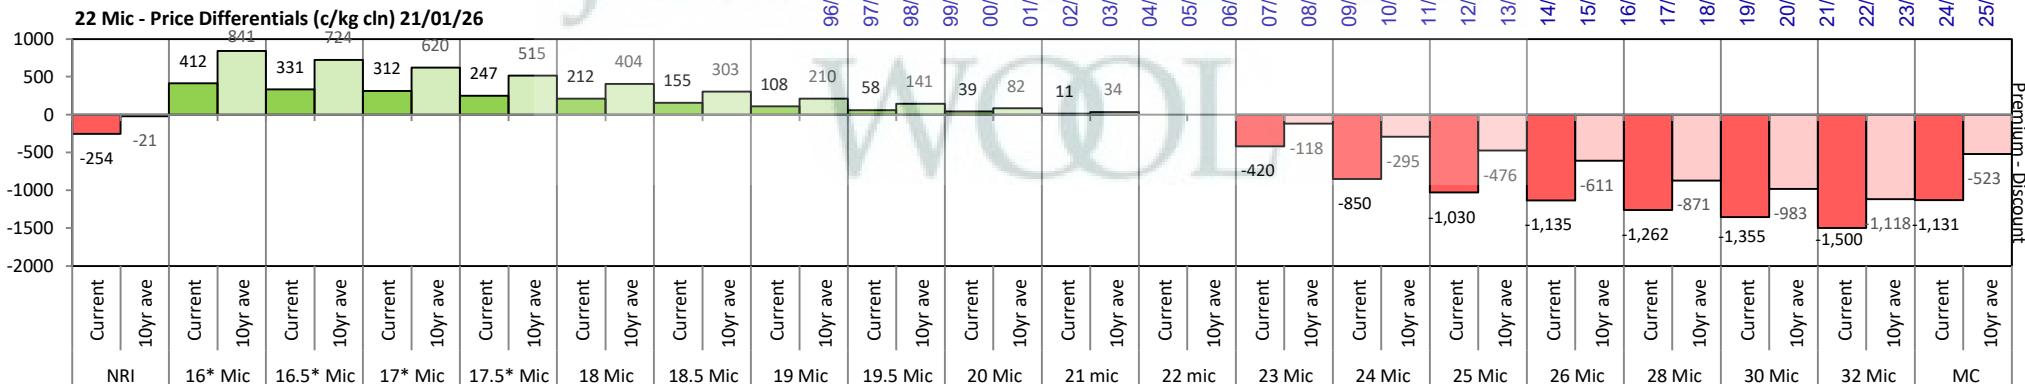

(week ending 23/01/2026)

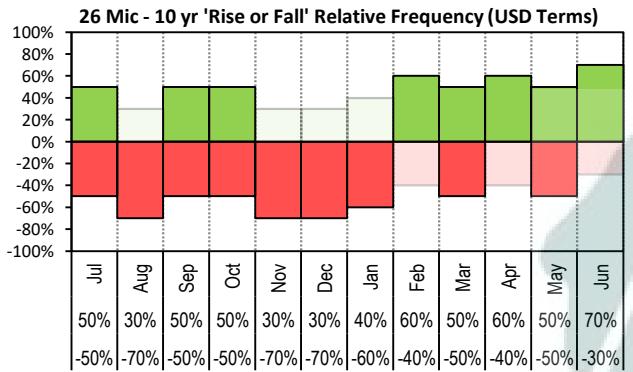

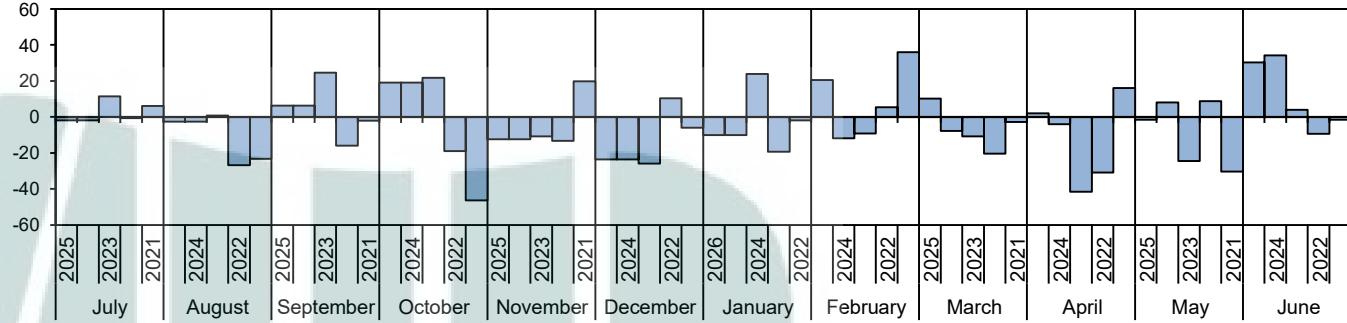

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The '**Monthly Price Movement**' graph shows the extent of movement for each month, for the past 5 years.

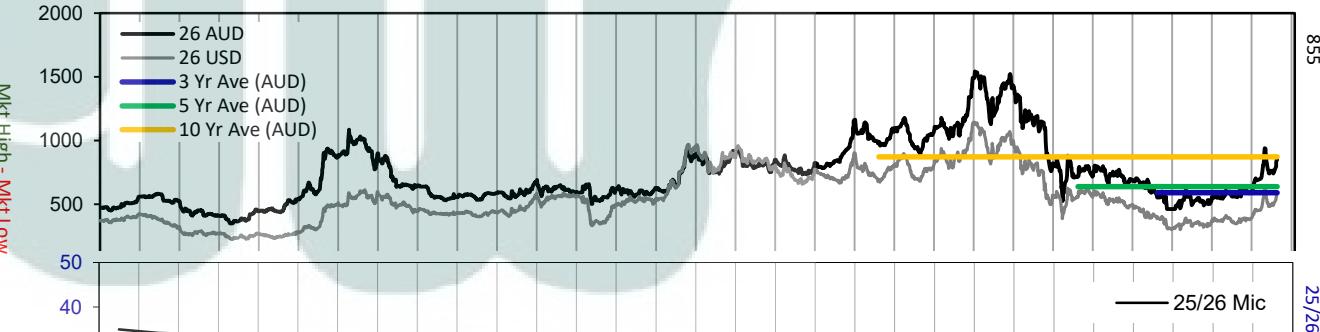

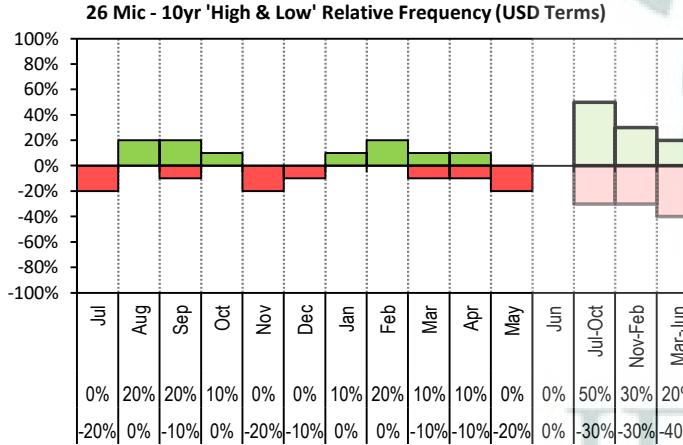

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

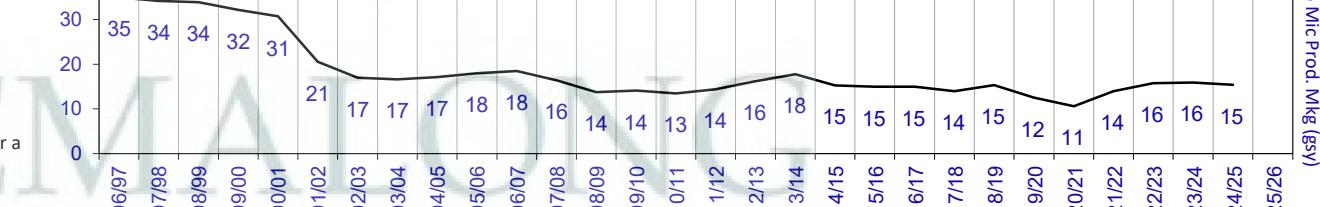

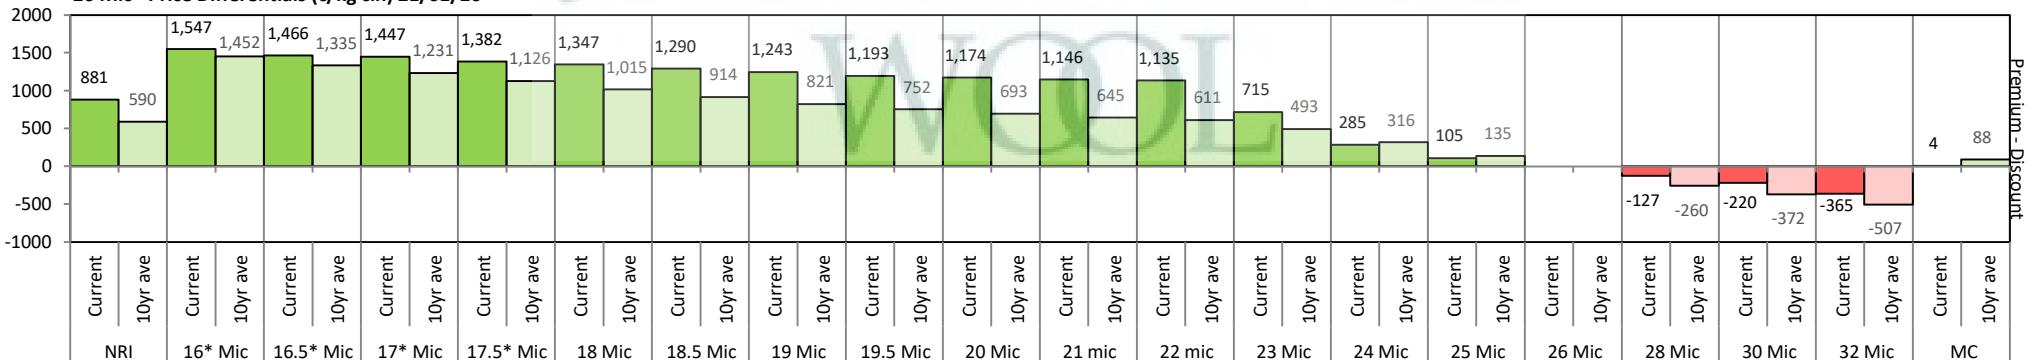

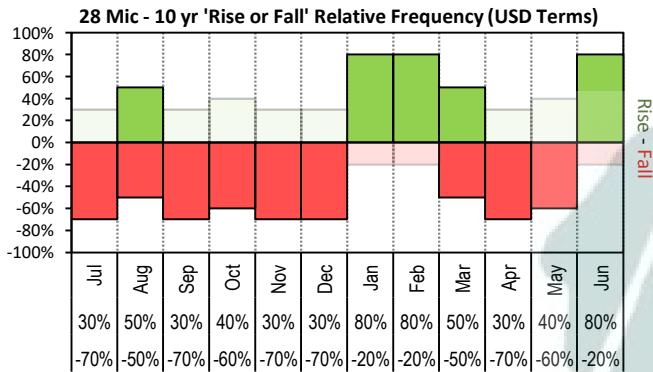

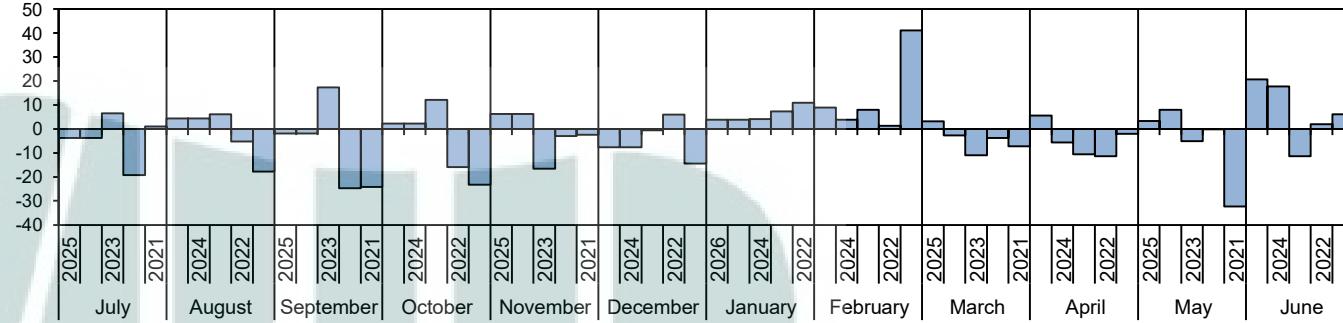

**26 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

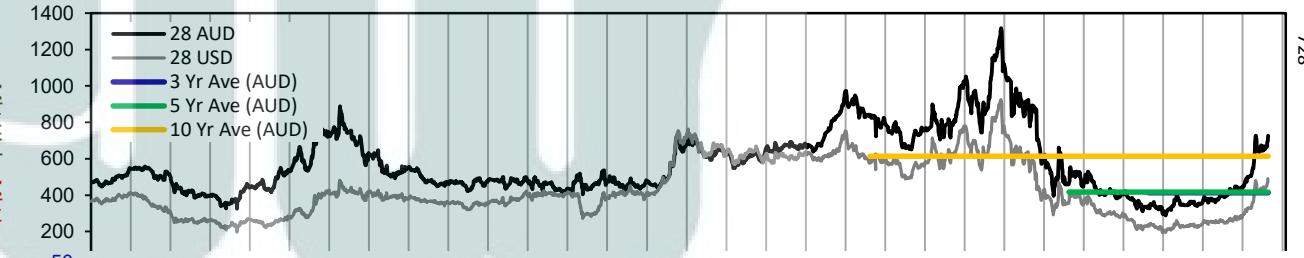

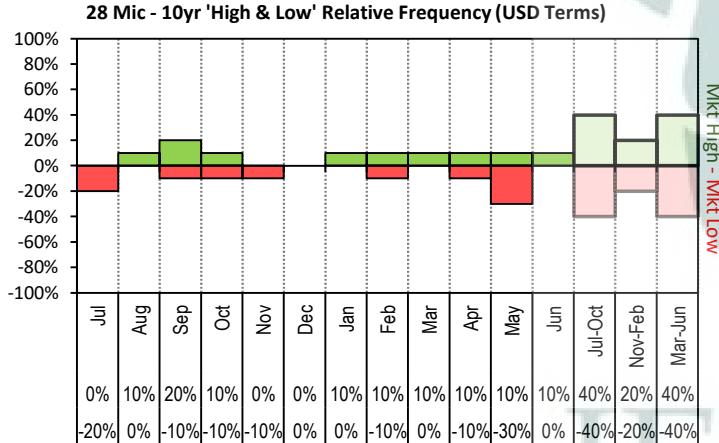

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

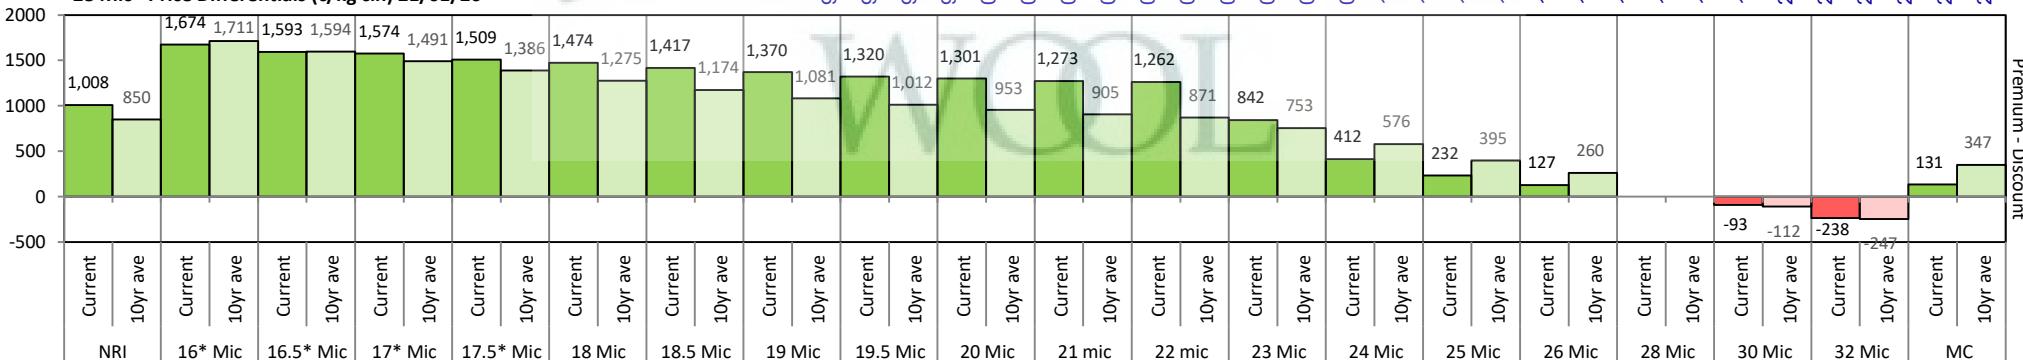

**26 Mic - Price Differentials (c/kg cln) 21/01/26**

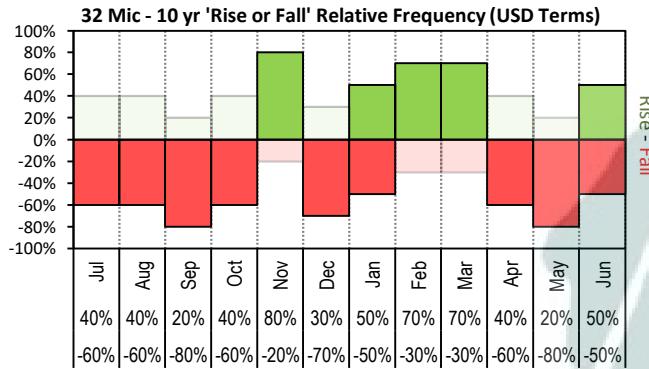

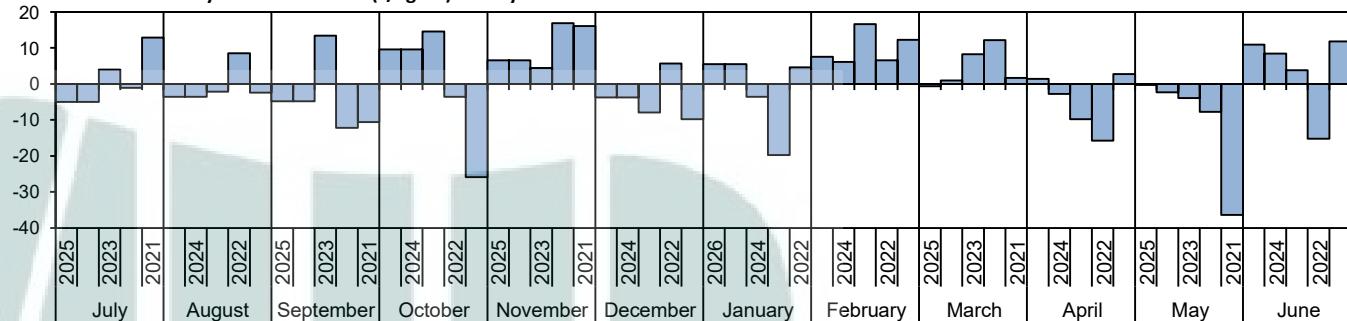

**28 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

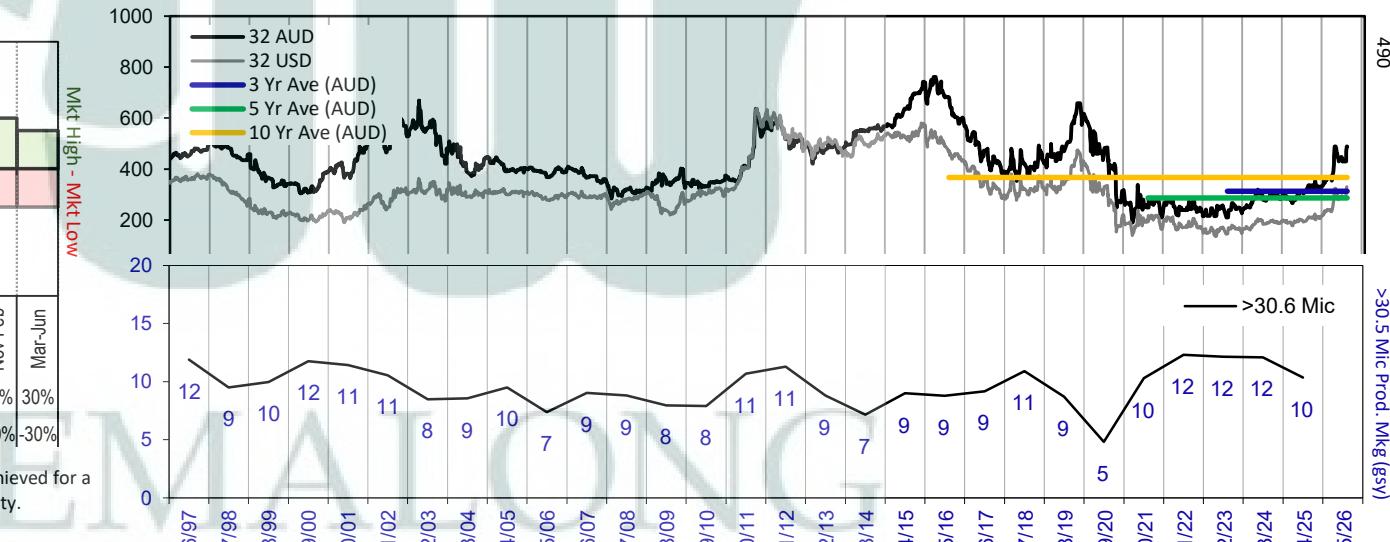

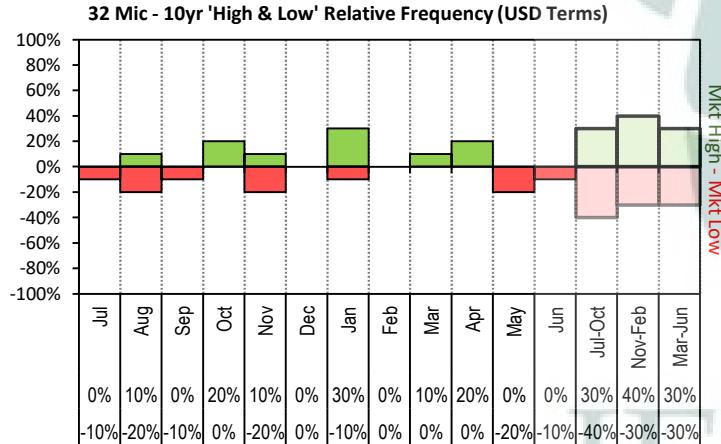

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

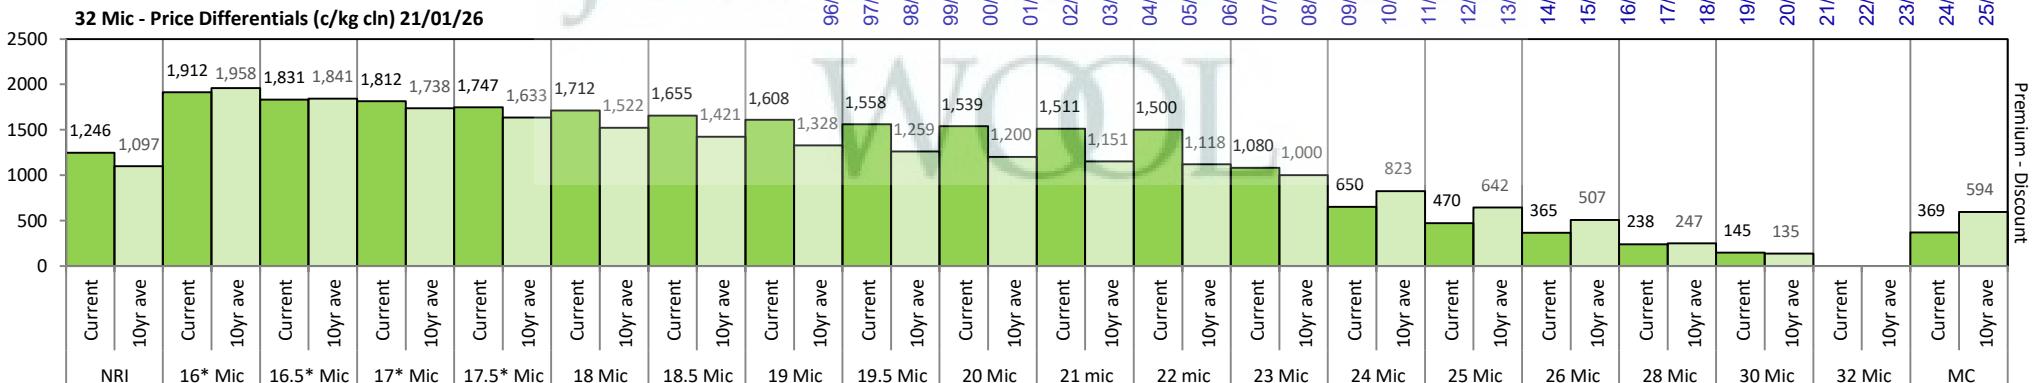

**28 Mic - Price Differentials (c/kg cln) 21/01/26**

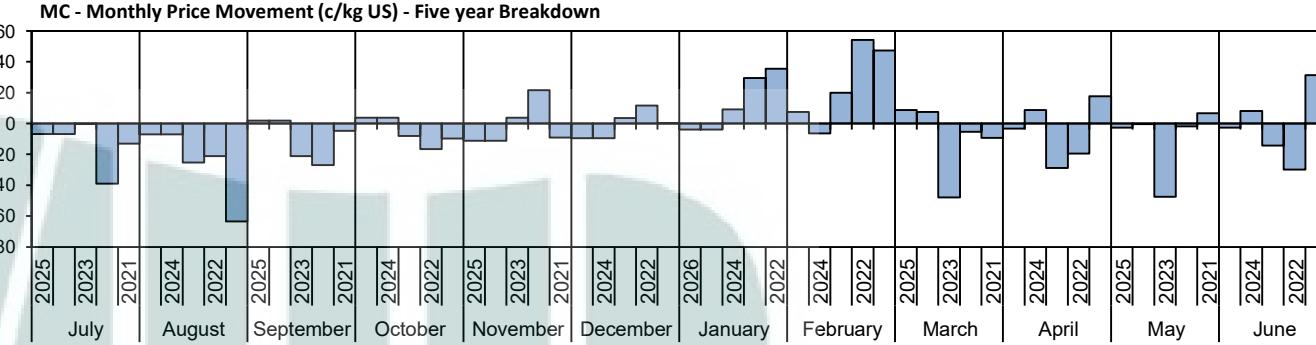

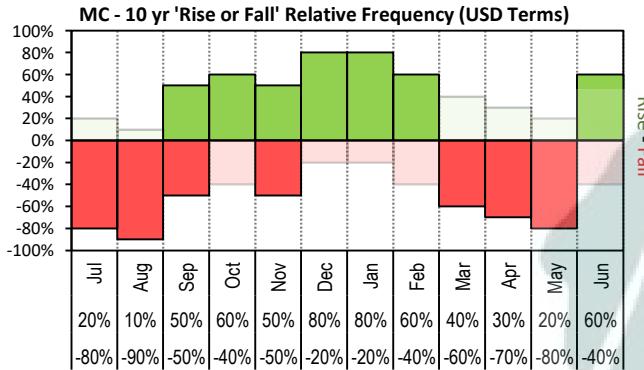

**32 Mic - Monthly Price Movement (c/kg US) - Five year Breakdown**

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

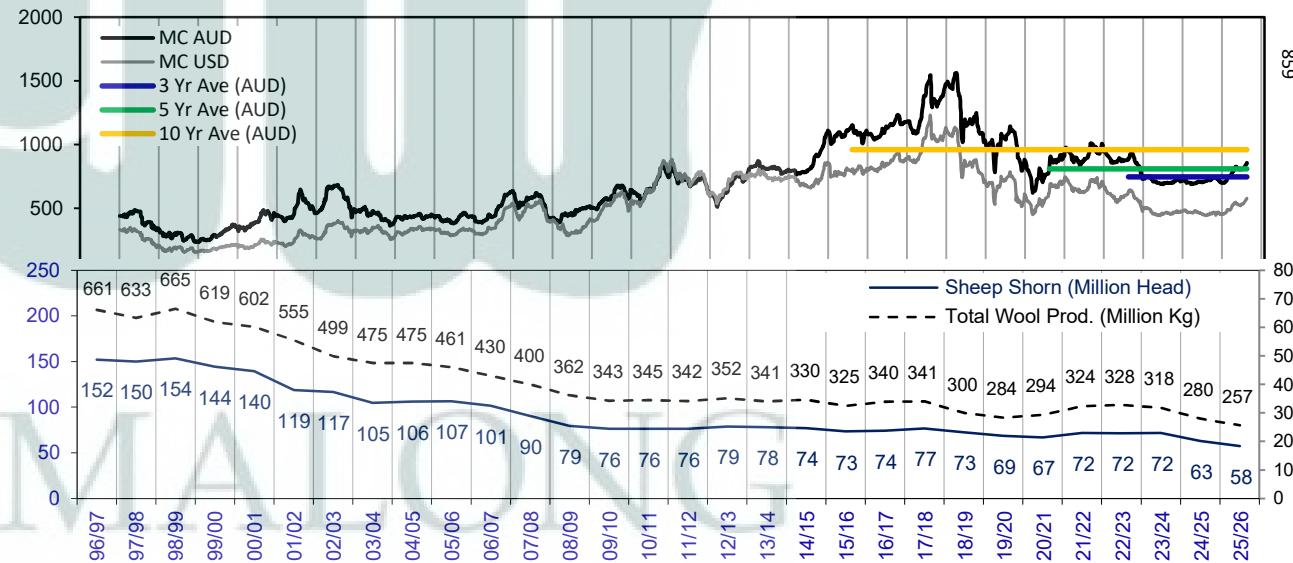

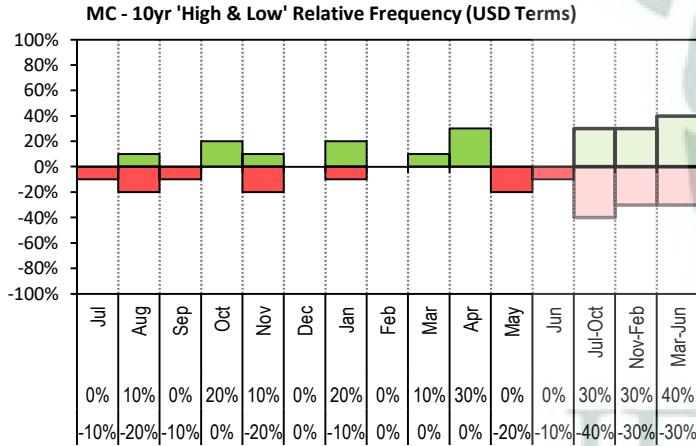

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

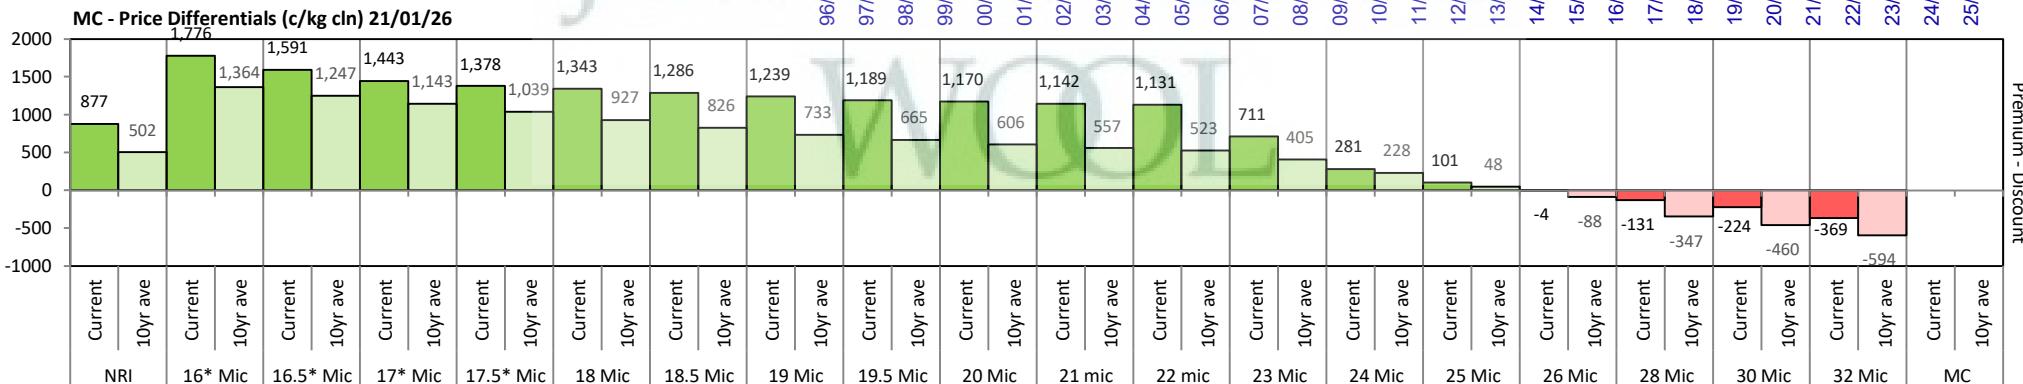

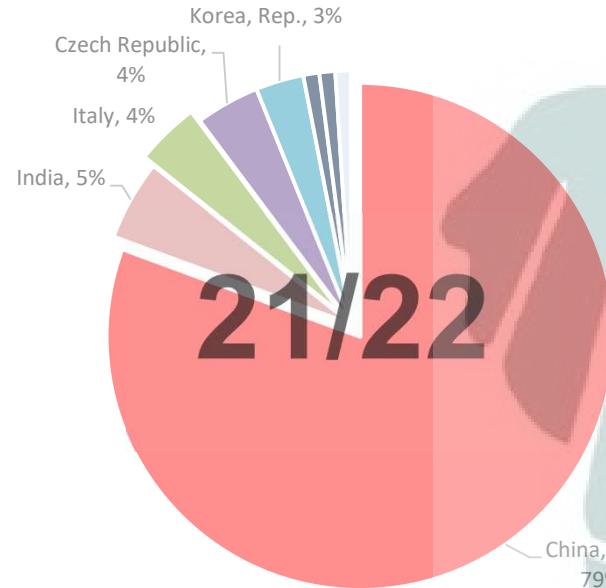

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

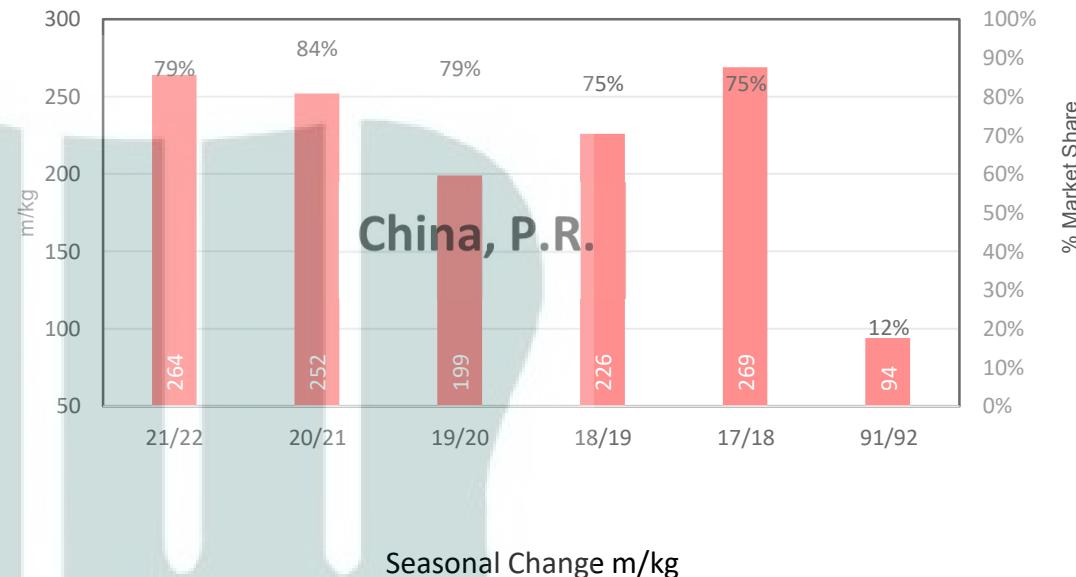

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 9: Returns pr head for skirted fleece wool.**

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
