AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																	
AU BALES SOLD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

**MARKET COMMENTARY** Source: AWEX

Overall, the wool market recorded positive movement this week, although not all sectors of the market managed price rises.

Strongest buyer demand continued to be in the finer microns, as a result 18 micron and finer recorded solid price rises, which were reflected in the individual MPGs for 18.5 micron and finer, which gained between 34 and 126 cents. The movements in the MPGs for 19 and coarser ranged between -47 and +49 cents. Having not sold last Thursday, Sydney and Fremantle played catch-up this week, and as a result the weekly movement in those centres exceeded those recorded in the South.

In the North, the benchmark indicator (NRI) gained 43 cents to finish the series at 1398. Merino fleece  $\leq 17.5$  micron gained over 100 cents, while demand for the medium to broader microns was less intense, resulting in gains of 10-20 cents for 20-21 microns, while 22 micron and broader lost some ground.

The oddment market posted overall positive results for the second consecutive week, with general gains of 15-30 cents for locks, stains and crutchings, while only minor movements were recorded in the crossbreds.

The large rise in the finer merino microns, has in part contributed to a significant increase in next week's offering. There is currently 50,821 bales on offer in Sydney, Melbourne and Fremantle.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2088 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1536 for 60% of the time, over the past ten years.

# JEMALONG WOOL BULLETIN

(week ending 22/04/2021)

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

# JEMALONG WOOL BULLETIN

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
