AU BALES OFFERED		35,481	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The market has been unable to prevent its downward slide, recording an overall loss for the fourth consecutive series. However, unlike recent weeks, where most losses were felt in the finer merino types, this week's falls were experienced across all merino fleece types and descriptions. The market opened noticeably lower and continued to fall as the week progressed, and by the end of the series, the individual merino MPGs had lost between 7 and 90 cents; the only exception was the 20-micron MPG in Melbourne, which recorded no change. Buyer sentiment in the crossbred sector was low, resulting in limited demand and weak bidding on many types. The offer prices were generally 25-55 cents lower than the previous series. In percentage terms, the crossbreds recorded the most significant falls. In the South, the MPGs for 26 microns fell 56 cents (-8%), the 28-micron indicator fell 26 cents (-6.9%), and the 30-micron MPG fell 31 cents (-9.5%). The oddments were the strongest performing sector, with the three carding indicators recording no change on average.

The EMI fell 26 cents to close the week at 1,279. The benchmark indicator is now at its lowest point since March 2021, with its last weekly rise recorded on the 22nd of June.

Quantities for next week fall due in part to the lower prices discouraging some sellers from the market. There are expected to be 31,994 bales on offer nationally, with sales being conducted on Wednesday and Thursday due to several Public Holidays (Friday in Melbourne and Monday in Fremantle).

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1679 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1673 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 14: Returns pr head for skirted fleece wool.
