AU BALES OFFERED		33,740	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

## MARKET COMMENTARY Source: AWEX

The market went on a rollercoaster journey this week, with both large upward and downward movements experienced. From the opening lot on the first day, buyer sentiment was extremely positive, it was immediately apparent that the market was heading rapidly higher. By the time the final hammer fell in the West, the individual MPGs across the country had risen by 110 to 153 cents. The AWEX NRI added 123 cents for the day, this equated to an 11% increase, which was the second largest rise on record for the EMI, only beaten by the 130 cent gain recorded in September last year. The EMI closed the day at 1,240 cents, which was its highest level this season.

On the second day of selling, buyer sentiment cooled slightly, resulting in the market losing some of the large gains enjoyed on the first day. The MPGs fell by 23 to 99 cents. On the back of these losses the EMI dropped by 21 cents, as strong gains in the crossbreds prevented a larger fall.

Despite the second day losses the EMI recorded an overall positive movement of 102 cents for the series, closing the week at 1,219. As the finer microns have risen at a greater rate than the broader ones, the price differentials between microns have stretched. In the first sale of the current season, the difference between the 18 and 21 MPGs was 204 cents, the difference between the 18 and 21 MPGs has now increased to 379 cents.

The crossbred sector recorded the largest rises, with the 28 and 32 MPGs rising by 28%, the largest weekly rise for 28 microns on record.

Next week's national offering rises to 44,004.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

\* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

**Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2143 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1573 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
