AU BALES OFFERED		24,974	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market continued to retract this week, with general losses recorded across the country. The national offering was only 24,874 bales, in Sydney the weekly offering was 4,696 bales, this was the lowest weekly offering in the North since AWEX records began (1997/98). Overall numbers continue to be well down on the previous season, when compared to the same time last year, there has been 152,758 fewer bales put through the auction system, this is a fall of 10.9%.

The smaller offering helped to increase buyer demand, although main buyer focus was on the better style wools and those with favourable additional measurement results. These better style wools recorded minimal movements, however the large selection of lesser style wools and those with poor additional measurement results were not as well supported, losing ground as the sale progressed. The losses in these types was the impetus behind the reductions in the individual MPGs which generally fell across the country by 2-50 cents. The only exceptions were the finer microns, which record modest upward movements. Crossbreds also recorded overall losses, with 26 to 28 microns losing 13-34 cents.

The NRI lost 18 cents for the series, closing the week at 1,307 cents. When compared to the corresponding sale of the previous season the NRI has fallen by 672 cents, a reduction of 34%. Next week's national offering increases slightly, there are currently 25,554 bales on offer.

Due to reduced quantity Sydney only requires a one-day sale, selling on Wednesday. Melbourne and Fremantle will sell on Tuesday and Wednesday.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2136 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1570 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
