* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

81.34 US as of 23/08/2007

NORTHERN REGION – Newcastle Sale N08/07

On Tuesday – A small offering contributed to the solid market. Prices were 20 cents clean dearer when compared to last week's lesser-styled selection (with all microns attracting good support). Spinners were in short supply, the few that were available sold at levels close to those established in the previous Newcastle sale in February. Merino skirtings also attracted good competition and rose 20 cents. Best brokenes were keenly sought after; rising 30-50 cents clean. Locks & Crutchings rose 30 (combing length crutchings were 30-50 dearer). Crossbreds were mostly unchanged on a limited offering. 3,447 bales were offered for sale with 5.3% Passed-In.

On Wednesday – The market continued to edge higher (on the back of an improved offering). The larger selection of Spinners were well supported and were in line with prices achieved in February. Lower style & strengths had mixed results especially around 16.5 & 17 microns which eased slightly compared to 18 and 18.5 microns which rose around 10 cents. Broader microns remained mostly unchanged with odd better styles edging higher. Good support for Merino skirtings saw better styles rise 10 to 20 cents. Locks & Crutchings rose 10-20 cents (better styles & lengths were most affected). Crossbreds were in line with the rest of the market, making gains of about 10 cents for most types when compared to last Thursday. 6,259 bales were offered for sale with 1.8% Passed-In.

On Thursday – there were mixed results evident. Although the market was generally trending lower, better styled types at the finer end still managed good support with selected pockets of spinners 10 to 20 cents dearer. Lower styles were patchy with most 10 cents cheaper. 18.5 microns and broader also lost ground, with the bulk of the offering losing 10-20 cents. Best brokenes were well supported on a good selection (rising 10 to 20 cents). Other types had mixed results with the lower styles easing 10 cents. Better style oddments were unchanged however others were 5 cents cheaper. Crossbreds were also 5 to 10 cents cheaper. 5,416 bales were offered for sale with 6.6% Passed-In.

Next Weeks offering consists of 48,321 bales (an increase of 9.3% on the previous estimate of 44,200).

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirlings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: 4 kg

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
