Note:

* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

MARKET COMMENTARY

One Australian Dollar = 1.049820 US as of: 23/08/2012

NORTHERN REGION –Sale Week 08/12 (38,230 bales offered nationally)

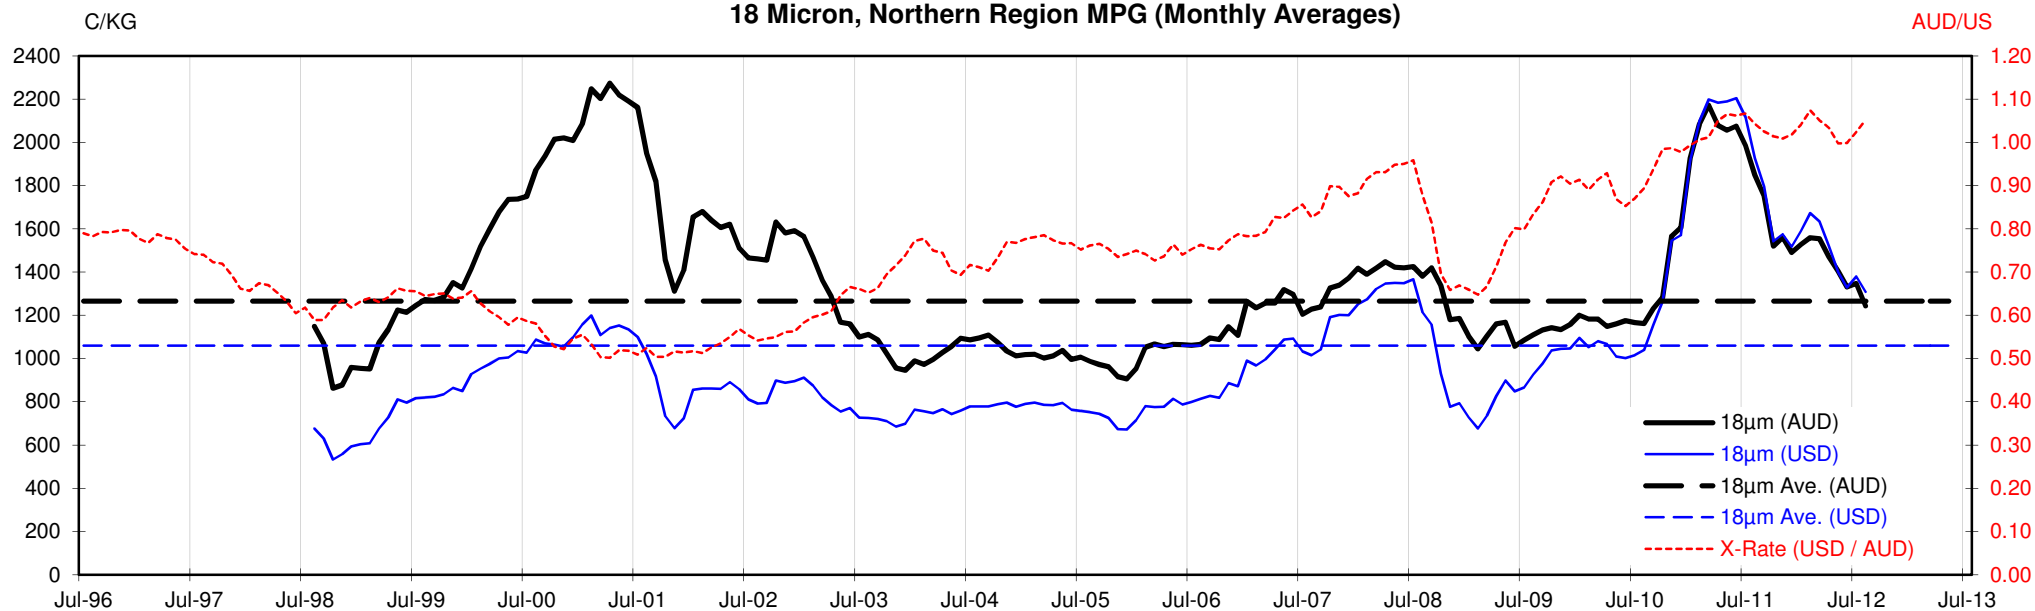

Wednesdays market continued to slip lower with 19 microns and broader easing by 15-20 cents while 18 microns and fine slipped 40-50 cents. Merino skirtings had better supported than the fleece market, with all descriptions only easing 10-20 cents (with the broader microns least affected). In the oddments, support improved slightly for locks as the sale progressed, to end the day fully firm. Crutchings & stains did however ease a further 5-10 cents. A small offering of crossbreds helped maintain their previous levels as 27 to 30 microns closed unchanged. 13.8% Passed-In.

Thursdays market was a welcome turn around, with strong buyer support from the opening, which improved as the sale progressed. While the finer end remained unchanged, 19.5 micron and broader gained 15 cents. Merino skirtings had an irregular start however all descriptions ended the day generally unchanged, except the BLS which eased 10-20 cents. All oddments were well supported, with locks & crutchings closing 20 cents dearer while stains improved by 10 cents. Crossbreds also gained ground with 28 microns 5 cents dearer and 30 microns 15 cents dearer. 8.7% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
