* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

MARKET COMMENTARY

Australian Dollar

66.50 US as of 23/10/2008

NORTHERN REGION – Sale S17/08

Due to the global financial crisis, many mills are finding it increasingly difficult to get finance and are therefore running their operations at a significantly reduced capacity. The volatile exchange rate is only adding to an already difficult trading environment. Talk in the trade suggests a rough ride over the coming 2-3 months, beyond that is unclear. It may not be until some time in the New Year that we see stability return to the market. Key signs to look for that may indicate a turn around are, a stable AUD/US exchange rate (which is more important than a falling dollar) and signs that some confidence is returning to global financial markets.

This weeks sale was the largest this season with over 71,000 bales rostered nationally. The increased volume combined with a rise in the AUD and a fall in orders (due to tight finance) made Tuesdays market one of the toughest since the SAARS out brake in April 2003.

On Tuesday the NRI lost 78 cents with 21 micron and broader falling 70-80 cents, 19 to 20 microns fall 90 cents and the finer microns lost 100-140 cents. Skirtings fell in line with the fleece recording a 70-80 cent reduction for all types. Locks & Crutchings were 5-10 cents easier for 19 micron and broader while the finer microns lost 15-20 cents. Stains closed 20 cents down as did 26 to 32 micron crossbred. (Passed-In rate of 38.6%)

On Wednesday the market steadied with 19 to 20 microns only slightly easier, 21 to 22 microns were down 6-16 while the broader end rose 7 cents on a limited offering. The finer microns of 17 to 18 slipped further with good style 35 nkt lots 20-30 cents cheaper, while the best style & strength types were well supported. Skirtings were generally unchanged for the <4% Vm types, higher Vm types were irregular and generally down 10. Washing locks gained strong support rising 10-15 cents while the carbo types and crutchings were firm with stains easing a further 5 cents. 26 to 28 micron crossbred eased 5-10 cents while the 30 micron and broader types gained slightly. (Passed-In rate of 23.2%)

On Thursday the market was mixed with medium to fine wools easing 5-10 cents despite the better style and strength lots being well supported. All skirtings closed up to 20 cents cheaper. Locks & Crutchings were firm remaining unchanged with better crutchings attracting a premium. Stains eased a further 5 cents and crossbreds lost about 10 cents for the 26 to 30 micron categories. (Passed-In rate of 24.2%)

Next weeks offering is estimated at 54,473 bales, an increase of 1.6% on the previous estimate of 53,595 bales.

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 11: Returns for fleece wool pr head, based on skirted weight of: **4 kg**

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg
