**Note:**

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

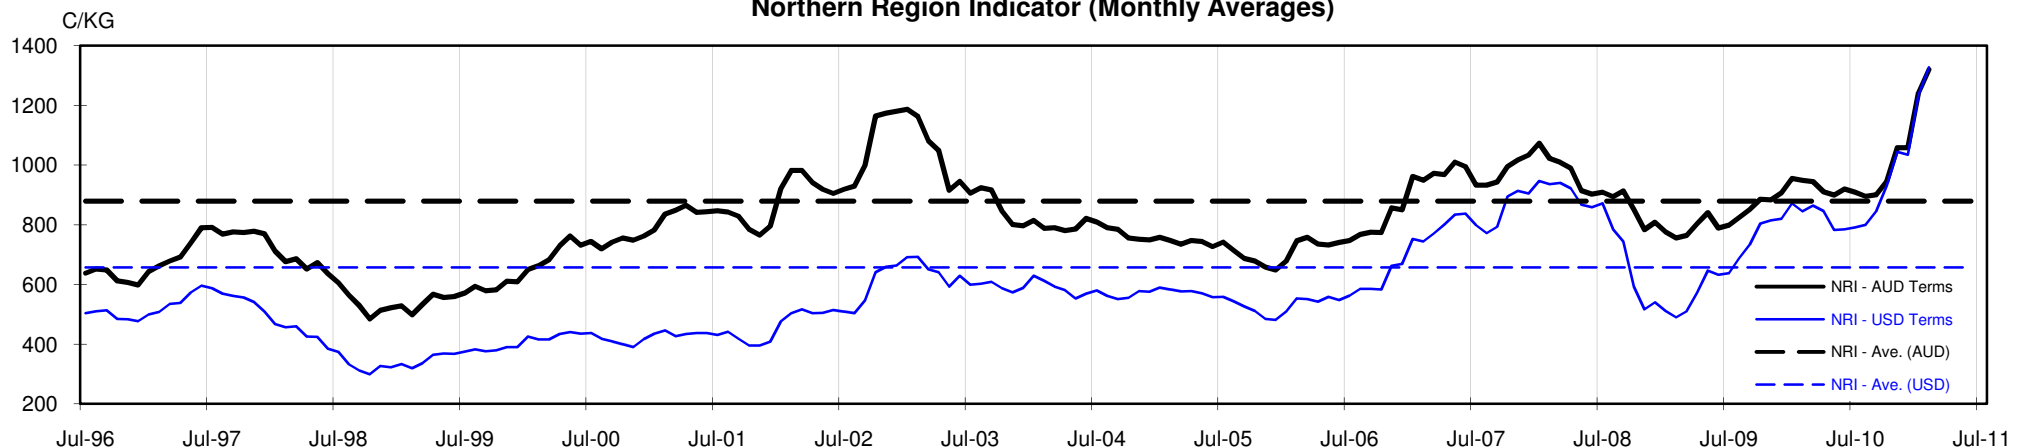

**One Australian Dollar = \$ 1.01 US, as of 24/02/2011**

**NORTHERN REGION –Sale Week 34/10 (51,524 bales offered nationally)**

On Wednesday - The market continued to attain higher levels, with buyers pushing the finer microns up 50-80 cents, with the exception of the 18 micron area which rose 10-20 cents. 19 to 20 micron fleece rose 30-35 cents while the broader end added 20. All skirtings posted significant gains, increasing by 30-50 cents, with the better style & length lots even higher. Locks, crutchings & stains followed the rest of the market gaining 10 cents, while strong competition had 26 to 32 micron crossbred 20 to 25 cents dearer.

On Thursday - Fine microns all retreated today by 20-30 cents under a lack lustre offering (perhaps in anticipation of next weeks Newcastle offering). 19.5 micron and broader however, all ended the day par to a little higher with 21 microns most affected. Skirtings remained solid through out the day with all descriptions closing fully firm and unchanged. 19 micron locks gained 10 cents, crutchings were firm while stains picked up a further 5 cents. Crossbreds also remained firm to slightly dearer, with 28 microns gaining around 10 cents.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
