\* Note: Due to the irregular market quoting for super fine wool, figures shown relating to micron categories below 18 mic, are an estimate based on the 42 nkt AWEX Premium & Discount Report & other available information. 10 year data is not available on some micron categories, which may result in blank spaces in the table above.

## MARKET COMMENTARY

Australian Dollar

78.18 US as of 24/01/2007

### NORTHERN REGION – Sydney Sale S30/06

On Tuesday – After making solid gains over the past few weeks the market has made a correction. For Merino fleece, prices were generally 30 cents cheaper than last Thursday with inferior styles falling up to 40 cents clean. A positive signal for the day was shown in the few better style 16.5 and 17 micron types which showed little change (lower styles in this range were up to 30 cents lower). Merino skirtings were only marginally lower (5-10 cents cheaper). The crossbred market showed a similar pattern with only a minor decrease recorded for the majority of types. In the Oddments, Locks were 5-10 cents cheaper, Best bulk/style crutchings were very firm while others were unchanged.

On Wednesday – The market continued to track lower, following on from Tuesday's falls. Better style, finer micron merino fleece were relatively well supported and closed 10-15 cents cheaper. Good styles and lower strength fine wool types were up to 30 cents cheaper which was similar to the drop in the medium to broader categories which also dipped 30 cents. There was support evident towards the close with prices generally firming in the final hour of trading. Merino skirtings saw most types 5-10 cents cheaper, Crossbreds were marginally lower with most types 5-10 cents cheaper, there were a limited number of 31 & 32 micron types on offer and these types were generally unchanged. Locks & lower style crutchings were unchanged, while best style & bulk lots were keenly sought after closing 2-3% dearer.

Next week sees a large offering of 83,884 bales (an increase of 30% on the previous estimate of 64,560 bales).

A Decile rank is a rating, usually of performance, on a scale of 1 to 10 where 1 is best, 10 is worst, and each number corresponds to an increment of 10 percentage points.

A percentile is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general, a percentile less than 25 is considered below normal, a percentile between 25 and 75 is considered normal, a percentile greater than 75 is considered above normal.

Table 6 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 9kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 7: Returns for fleece wool pr head, based on skirted weight of: 8 kg**

Table 8 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 7kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 9: Returns for fleece wool pr head, based on skirted weight of: 6 kg**

Table 10 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 5kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 11: Returns for fleece wool pr head, based on skirted weight of: 4 kg**

Table 12 shows estimated returns per head on fleece wool, based on a skirted fleece weight of 3kg. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

**Table 13: Returns for fleece wool pr head, based on skirted weight of: 2 kg**
