AU BALES OFFERED		26,179	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		21,822	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The Australian wool market has closed out the 2025/26 wool selling season weakly, recording large overall losses. A total of 26,179 bales were available to the trade. For the season, a total of 1,512,940 bales have been offered through the auction system, which is 52,869 bales lower than the previous season, a 3.4% reduction.

The overall drop was driven by large falls in the merino fleece sector. These losses were reflected in the Merino Fleece Micron Price Guides (MPGs), which dropped by 15-105 cents for the week. In contrast, the crossbred sector recorded gains, with their MPGs rising up to 55 cents. The stronger crossbred market prevented the EMI from recording a larger fall. The EMI lost 46 cents for the week, closing the season at 1,943 cents.

Although the market had a negative finish to the season, the season has been one of spectacular gains. The EMI opened the season at 1,207 cents; over the course of the season, the EMI added 736 cents, an increase of 61%. In USD terms, the EMI added 557 US cents for the season, an increase of 71%.

Despite the overall smaller national seasonal offering, the total dollar amount of wool sold has well exceeded the previous season. A total of 2,614 million dollars' worth of wool has been sold through the auction system, which is 675 million dollars more than the previous season.

Next week is the first sale of the 2026/27 wool selling season, which is normally one of the larger sales of the season, with some sellers waiting to sell in the new financial year. Currently, 33,489 bales are expected to be offered nationally.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1515 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1743 for 60% of the time, over the past ten years.

Average Price of Australian Wool

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The top chart displays the market high and low for the AUD/USD pair from 1977 to 2016. The y-axis ranges from 100 to 3000. The 19-year moving average (black line) shows a general upward trend, peaking around 2000 in 2008 and then declining. The 3-year average (blue line), 5-year average (green line), and 10-year average (yellow line) are also shown. The bottom chart displays the 19-year moving average (black line) from 1977 to 2016. The y-axis ranges from 0 to 100. The 19-year moving average (black line) shows a general upward trend, peaking around 80 in 2008 and then declining. The 3-year average (blue line), 5-year average (green line), and 10-year average (yellow line) are also shown.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
