AU BALES OFFERED			* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD			* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI

In the opening week of the 2026/27 selling season, the Australian wool market gave back some of its recent gains. The pattern was similar to the previous week, with most of the losses recorded on the first day of sales. Despite another fall in the Australian dollar, the currency movement was not enough to generate stronger buying support. The EMI closed 39 cents lower at 1,904 A¢/kg, while in US dollar terms it finished at 1,312 US¢/kg, down 30 cents. In the Western region, where sales were held on one day only, losses were also concentrated, with the market finishing 57 cents lower at 2,072 A¢/kg, or 1,427 US¢/kg, down 43 US cents.

Across the catalogue, fine Merino types came under heavy pressure, with most indicators easing by around 60-65 cents across the selling centres. Medium also weakened, generally falling by 55-60 cents. Crossbred types performed better, remaining mostly unchanged to slightly dearer, with some indicators gaining around 5 cents. Merino cardings were also softer, easing by around 20-25 cents.

The market looks to be consolidating after its recent run, with price pressure coming from higher new-season offerings, selective buying and greater discounts on lower-specification wools. Better style, low-VM types continue to find support, but buyers are clearly being more selective across the broader catalogue. As a result, upside may remain limited until Spring brings a larger selection of fresh, higher-yielding wool to the market.

Next week sees 31,583 bales rostered with Sydney and Melbourne selling on Tue-Wed while Fremantle on Tuesday only.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1520 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1747 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
