AU BALES OFFERED		31,960	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																		
AU BALES SOLD		29,784																			
AU PASSED-IN%		6.8%	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.																		
AUD/USD		0.6595 -2.2%

## MARKET COMMENTARY Source: AWEX

Heavily influenced by currency movement, the market recorded an overall increase in this series; and whilst all three centers were in operation (in what was the last Auction sale for a month), only 31,960 bales were offered. The lower AUD combined with restricted supply, resulted in robust buyer activity, as such, this series posted the first weekly rise in over a month.

With buyers taking the opportunity to finish orders before the break, this week saw some significant rises, with Merino fleece MPG's gaining up to 85 cents, leaving the EMI to close the week at 1,124 (+17 cents).

Currency played a large role in the weekly movements, so much so that when viewed in US dollar terms the market lost ground, closing the week at 742 (-4 US cents).

Sales now head into the annual mid-year (3-week) recess, moved this year from Weeks 3-5 to Weeks 5-7. Sales resume in Week 8 (W.C. 19th of August).

**Definitions:**

- \* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.  
Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.
  - \* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.  
The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years
- Example:** In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1656 for 60% of the time, over the past three years.  
In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1468 for 60% of the time, over the past ten years.

The top chart shows the historical exchange rates of the Australian Dollar (AUD) and the US Dollar (USD) from 1967 to 2024. The AUD is represented by a black line, and the USD by a grey line. The 3-year moving average for AUD is shown as a blue line, the 5-year moving average as a green line, and the 10-year moving average as an orange line. The AUD rate shows significant volatility, peaking around 2000 and 2011, and reaching a low around 2009. The USD rate is more stable, generally staying between 1000 and 1500. The 10-year moving average for AUD is a horizontal orange line at approximately 1600.

The bottom chart shows the historical price of 19 Micron in Mkg (gsy) from 1967 to 2024. The price is represented by a black line. The price starts at 64 in 1967, peaks at 80 in 2002, and then fluctuates between 50 and 70. The price is 70 in 2024.

The above 'Rise or Fall' graph, shows how often the market has risen or fallen in a given month over the past 10 years, it does not show the extent of the movement only the frequency of direction. The 'Monthly Price Movement' graph shows the extent of movement for each month, for the past 5 years.

The above graph, shows how often the '12 month high & low' have been achieved for a given month over the past 10 years. It is not a measure of probability.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
