**Note:**

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

**One Australian Dollar = 1.039105 US as of: 25/10/2012**

**NORTHERN REGION –Sale Week 17/12 (40,796 bales offered nationally)**

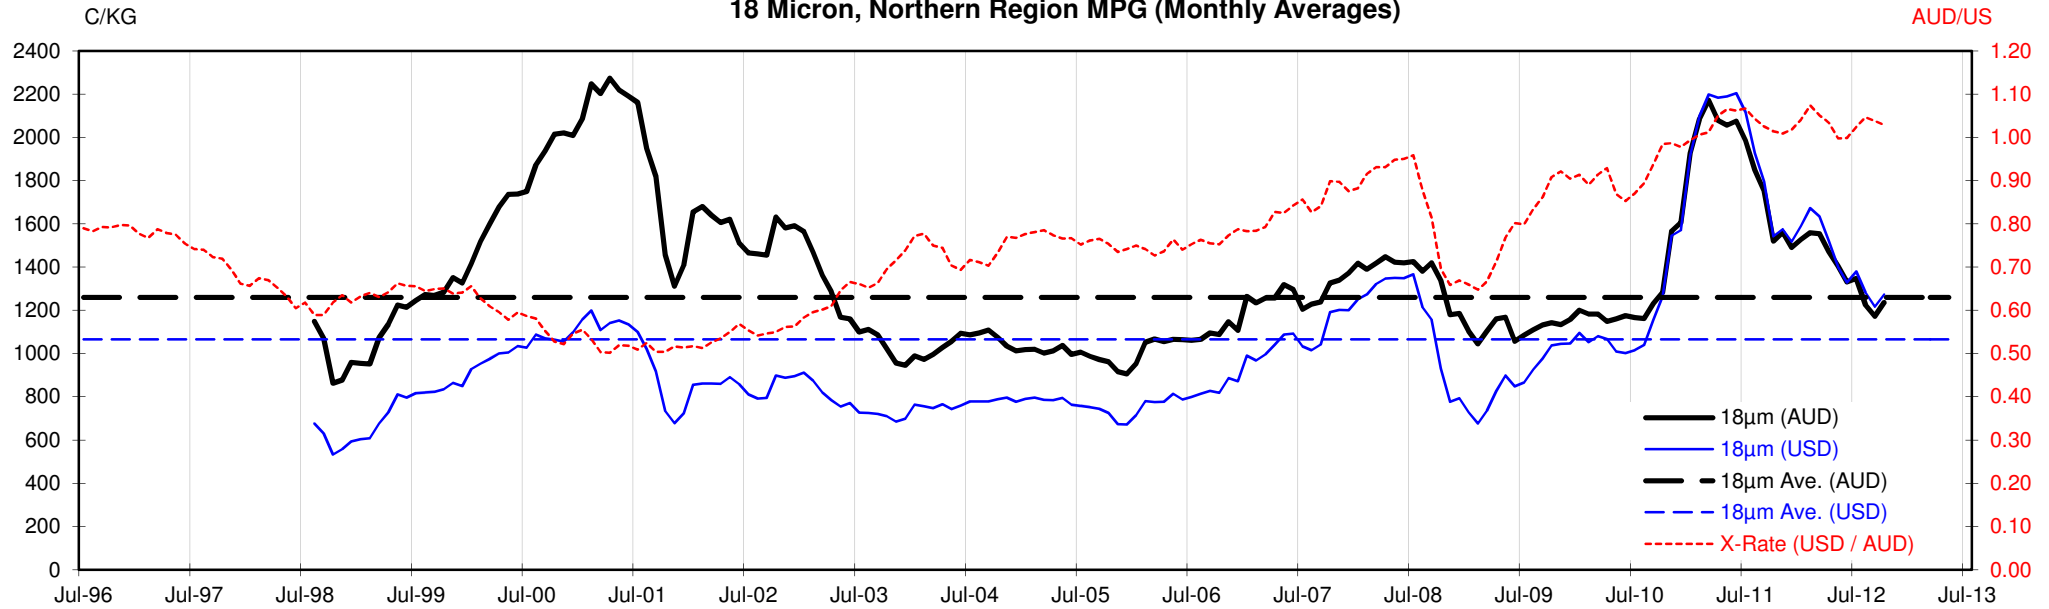

Wednesdays market kicked up gear in the first hour, pushing most microns 20-30 cents higher. Fine & medium microns all rose 30 cents with the broader range 20 cents dearer, with strong emphasis on the burrier lots. Strong buyer pressure had merino skirtings 40-50 cents dearer for most descriptions with  $\leq 3\%$  Vm most affected. Crutchings & locks ended the day fully firm to a little dearer while stains remained unchanged. In the crossbreds, 27 microns rose 15 cents while 28 to 30 microns remained fully firm and unchanged. 2.5% PI

Thursdays market continued to improve with most pressure found in the finer micron ranges. 18.5 micron & finer gained 40-50 cents, 19 microns were generally 30 cents dearer, while 20 micron and broader found an extra 10-15 cents. Merino skirtings continued to move north, with another day of 20-30 cent rises. The focus was on the 18 to 20 micron range with 3-6% Vm. In the oddments, washing locks were fully firm to sellers favour, while carbo types eased by 5-10 cents. Crutchings closed a little dearer on a limited selection and stains remained unchanged. 27 to 30 micron crossbred had good support, ending the day par to slightly dearer. 2.8% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
