AU BALES OFFERED		44,306	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																				
AU BALES SOLD		38,467	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWI & AWEX

After opening the 2023 calendar year with two consecutive rises, the Australian wool market has recorded an overall loss this week, albeit a very minor one. The AWEX Eastern Market Indicator (EMI) dropped 3 cents for the series, closing at 1,308 cents. The drop in the market was largely attributed to currency movement (with the AUD having gained 1.95 US cents, the EMI actually gained 24 cents (2.6%) when quoted in US dollar terms).

Good style types, particularly those with favourable additional measurement results, attracted the strongest buyer attention. This strong demand meant those types recorded very little change when compared to the previous series. In fact, some finer MPGs recorded overall increases. Most noticeable for 18.5 microns and finer in Melbourne, where the MPGs gained between 6 and 15 cents. Specialty non-mulesed wool continued to be highly sought after and attracted large premiums over mulesed types with similar specifications. Lesser styles wools and those with poor additional measurement results were not as well supported and were highly irregular. These wools accounted for many of passed in lots.

The skirting market followed a similar path to the fleece, good style low vegetable matter (vm) types received strong support and recorded very little change. Lesser style wool and higher vm lots did not have the same level of interest and were highly irregular, trending downward.

Next week's offering reduces, with 42,936 bales currently rostered nationally.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1659 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1677 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
