AU BALES OFFERED		42,934	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

The wool market steadied this week, managing to record small overall increases. Due to concerns over the possible disruption to supply, buyers were keen to take ownership of wool while they could. Main buyer focus was on the finer microns, pushing prices higher, the individual Micron Price Guides (MPGs) for 18 micron and finer rose by 6-39 cents across the country. The broader microns did not garner the same support, as a result the MPGs for 21 micron and coarser, fell by 23-26 cents for the series. The gains in the finer microns was enough to push the NRI higher by 13 cents for the week, to close at 1,482 cents. Worth noting, due to currency movement, when viewed in USD terms the gains were more considerable, with the NRI gaining 61 USc for the series. Next week's sale is slightly larger, as sellers scramble to get their wool to auction. Currently, there are 45,810 bales rostered.

An industry working group has been meeting daily to try to minimise the impact of COVID-19 on the Australian wool industry. One of the recommendations to come from this group, was to move wool auctions from enclosed rooms into more open-air environments, in effort to adhere to the strict social distancing rules dictated by the government. This week the auction rooms in Melbourne and Fremantle moved out into open space made available on the show floors, Sydney will follow suit for the upcoming sale. Another COVID-19 driven decision made this week, was to schedule a wool sale in Week 42, which was an Easter recess, in an effort to maximise the amount of wool that can be traded before a potential shutdown.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 2138 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1564 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
