Note:

Definitions:

^{*} Due to the irregular market quoting for some fine wool categories, <u>figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.</u>

^{*} For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

^{* 10} Year data is not available for some micron catedgories, which may result in blank spaces in the table above.

^{*} A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price. The higher the percentile, the stronger the market.

(week ending 26/04/2012)

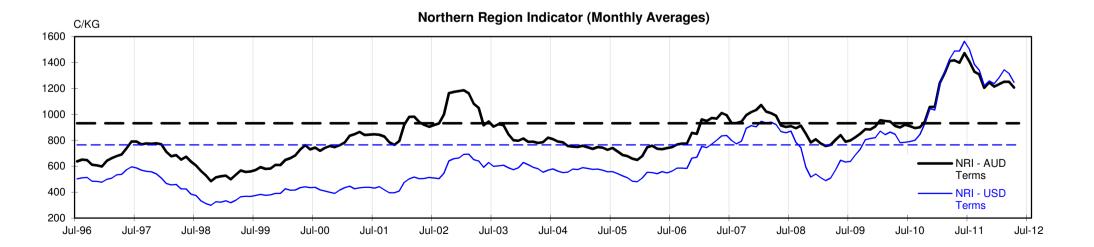

MARKET COMMENTARY

One Australian Dollar = \$1.04 US, as of 26/04/2012

NORTHERN REGION –Sale Week 43/11 (41,268 bales offered nationally)

<u>Tuesdays</u> market had buyers chasing the lower Vm lots, with 19 to 21 microns gaining 10 to 15 cents for less than 1% Vm while the 2% Vm los off set this gain some what by drifting 10 cents lower. The limited offering of finer microns also improved with 18 to 18.5 microns closing slightly dearer. Merino skirtings began the day irregular however buyer support improved by the close, with all descriptions unchanged. Locks eased 10 cents while stains gained 5-10 cents and crutchings remained unchanged. A smaller offering of crossbreds had most microns generally unchanged on a nominal basis. 4.3% PI

Thursdays market saw little movement in the MPG's, with buyers once again looking for the less than 1% Vm types and continuing to discount the higher Vm and higher mid break lots. Medium to broader microns ended the day unchanged with the finer microns attracting slightly improved support on a limited offering. All merino skirtings remained very firm with the lower Vm lots (<3%) attracting good wide spread competition despite heavy buyer discounting for the colour & cot types. In the oddments locks have taken a step back, with 18 to 21 microns closing 30 cents cheaper. Stains were irregular, generally easing by 5-10 cents while crutchings remained unchanged. 11.3% PI
