| AU BALES OFFERED | | | * 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided. | | | | | | | | | | | | | | | | | |
| AU BALES SOLD | | | * Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide. | | | | | | | | | | | | | | | | | |

MARKET COMMENTARY Source: AWI

After two weeks of losses, the market recorded an overall rise in this series. Selling commenced on Wednesday to accommodate Tuesday's Anzac Day Holiday. After last week's sizable offering, only 38,505 bales were offered to the trad (14,446 fewer bales than the previous sale).

With VM levels rising as the calendar year progresses, wool carrying less than 1% is becoming hot property (as these types become less available). Strong buyer interest in these FNF (free or nearly free) types was the driving force behind the gains made in the Merino fleece sector (with gains of up to 55 cents achieved in Sydney and Melbourne).

The crossbred and skirting markets in the East recorded very little change for the week, while the oddments eased slightly. The net result was a 13 cent increase in the AWEX Eastern Market Indicator (EMI), which closed 1,302 cents.

The Western region had a robust performance for the second week in a row. In Fremantle, the Merino fleece MPGs gained 22-60 cents, which helped push the Western Indicator up by 30 cents.

Currency again played an influential role, with the Australian dollar falling by nearly a full cent compared to the greenback.

Next week's offering is forecast to rise and although three selling days are available, only two are needed. There are currently 44,257 bales on offer.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years.

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1660 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1441 for 60% of the time, over the past ten years.

Table 4: Riemann Forwards, as at: 27/04/23 Any highlighted in yellow are recent trades, trading since: Thursday, 20 April 2023

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 12: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 15: Returns pr head for skirted fleece wool.

| Skirted FLC Weight 2 Kg | | Micron | | | | | | | | | | | | | | | | | |
