AU BALES OFFERED		23,651	* 16.5 is the lowest Micron Price Guide (MPG) published by The Australian Wool Exchange (AWEX). Therefore MPG's below 16.5 micron are an estimate based on the best available information at the time of publication. Likewise, for any category where there is insufficient quantity offered to enable AWEX to quote, a quote will also be provided.																			
AU BALES SOLD		23,185	* Recording of 15 & 15.5 micron commenced in October 2017, and as a result some historic data is not yet available for those MPG's. Where historic data is not available an estimate based on '16 micron statistics' and incorporating the existing 15 & 15.5 micron data, will be provided as a guide.

MARKET COMMENTARY Source: AWEX

After four weeks of successive overall losses, the wool market rebounded strongly this week, recording large price increases. There were 23,651 bales available to the trade, the smallest three-centre offering since Week 13 in 2020, during COVID. In contrast to the previous week, it was clear that large price increases were on offer as soon as markets opened in the Eastern centres.

The MPGs for merino fleece across the country rose by 30 to 75 cents. Once again, the main buyer interest centred on good style, low vegetable matter types, which attracted the largest price increase. However, all types and descriptions enjoyed rises as buyers fought hard to secure meaningful quantity in the smaller-than-normal sale. Most sellers were keen to accept the offered prices, resulting in a clearance rate of 98.2%. The EMI rose by 36 cents for the day and also recorded a healthy rise in USD terms, adding 38 US cents (3.0%).

On the second day, only Sydney and Melbourne were in operation, and the market generally continued to strengthen. The merino fleece MPG movements ranged from unchanged to plus 26 cents; the only anomaly was the 18.5 MPG in the North, which dropped by 15 cents. The EMI added a further 5 cents, closing at 1,853. The crossbred sector also had a favourable week; the rises in this sector helped to push the EMI up to the levels achieved.

Next week's offering is forecast to be slightly larger. It is currently expected that 26,000 bales will be offered nationally.

Definitions:

* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown on the bottom line of table 2 & 3 (above) and in table 1 (on page 1), detail the amount of time during the past 3 & 10 years where the market has traded either at or below its current price.

* Deciles are a method of sorting ranked data into 10 equal groups. The data may be ranked from largest to smallest or vice versa.

The above Decile tables sort price Percentiles into 10 equal groups (in ascending order), with table 2 ranking the previous 3 years prices, while table 3 ranks prices over the previous 10 years

Example: In Table 2, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1533 for 60% of the time, over the past three years.

In Table 3, a Decile Rank of 6 for 19 microns, shows 19 microns have traded at or below 1755 for 60% of the time, over the past ten years.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 9: Returns pr head for skirted fleece wool.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

Table 10: Returns pr head for skirted fleece wool.
