**Note:**

\* Due to the irregular market quoting for some fine wool categories, figures shown relating to micron categories below 18 micron are an estimate based on the AWEX Premium & Discounts Report & other available information.

\* For any category, where there is insufficient quantity offered to enable AWEX to quote, a quote will be provided based on the best available information.

\* 10 Year data is not available for some micron categories, which may result in blank spaces in the table above.

**Definitions:**

\* A Percentile, is a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. In general a percentile between 25% and 75% is considered normal, a percentile below 25% is considered below normal and a percentile above 75% is considered above normal.

Three and ten year percentiles shown in the table above, detail the period of time during the past 3 & 10 years that the market has traded either at or below its current price.

The higher the percentile, the stronger the market.

**MARKET COMMENTARY**

**One Australian Dollar = 1.040648 US as of: 27/09/2012**

**NORTHERN REGION –Sale Week 13/12 (36,642 bales offered nationally)**

Wednesdays market eased from the outset and remained soft as the sale progressed. Fine microns showed some support for the better style and strength types with low Vm, however the lower style and strength lots all retreated in line with the rest of the fleece offering, losing 15 to 20 cents off their previous levels, through to 22 microns. Good competition had all merino skirtings fully firm, locks and crutchings were also firm, however stains lost 5 cents. The crossbred market was just off the pace with 27 microns unchanged and 28-30 microns 3 to 5 cents cheaper. 9.1% Passed-In.

Thursdays market saw only minor movements across the board with 18.5 micron and finer well supported and tending in sellers favour while medium microns were par to slightly cheaper and 20 micron and broader all slightly cheaper. Merino skirtings enjoyed wide spread competition, resulting in a very solid market, leaving all descriptions fully firm with no quotable change. Locks and crutchings both gained 5 cents (on a limited offering) while stains were unchanged. Crossbreds also remained unchanged for 27-30 microns, albeit on a limited offering. 3.1% PI

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.

The above shows estimated returns per head for skirted fleece wool. These figures do not take into account the value of skirtings and oddments and do not take into account discounts that may apply for faults under individual circumstances. These figures are based on a market index of 100% and should be used as a guide only. Returns over \$30 / head for fleece wool are highlighted.
